### Physical and Technical Principles

#### 1 Physical and Technical Principles of Color Doppler Sonography

R. Kubale and G. Hetzel

<b>Historical Development</b> .....	2	Technical Principles and Equipment Settings .....	9
<b>B-Mode Sonography</b> .....	2	Technical Aspects of the Examination and Equipment Settings .....	16
Physical Principles of Echo Production .....	2	Analysis of Doppler Information and Artifacts .....	18
Principles of Ultrasound Instrumentation .....	3	<b>New Technical Processes and Approaches</b> .....	23
Analysis of B-Mode Information and Artifacts .....	7	New Developments in Transducer Technology .....	23
<b>Duplex and Color Doppler Sonography</b> .....	9	New Techniques of Signal Acquisition and Processing ...	24
Physical Principles of Motion Detection .....	9		

#### 2 Safety Aspects of Doppler and Color Doppler Sonography

H.-D. Rott

<b>Mechanisms of Tissue Effects</b> .....	29	<b>Measures to Limit Risk</b> .....	32
Heating .....	29	<b>Recommendations</b> .....	32
Cavitation .....	29	General Recommendations .....	32
<b>Risk Assessment of Various Ultrasound Techniques</b> ...	30	Pulsed Doppler .....	32
Duplex Sonography .....	30	<b>Appendix: Statements on the Biological Safety of Diagnostic Ultrasound Fields</b> .....	33
Color Doppler .....	31	EFSUMB Statement on the Clinical Safety of Diagnostic Ultrasound <sup>10</sup> .....	33
Power Doppler .....	31	WFUMB Statement on Thermal Effects in Clinical Applications <sup>25</sup> .....	33
Color Velocity Imaging (CVI) .....	31		
Transvaginal Scanning .....	31		
Ultrasound Contrast Agents .....	31		
Exposure of Gas-Containing Tissues .....	32		

### Infertility Evaluation and Assisted Reproduction

#### 3 Uterine Blood Flow in Fertile and Infertile Women

S. Kupesic and A. Kurjak

<b>Uterine Blood Supply</b> .....	36	<b>Uterine Blood Flow in Infertile Women</b> .....	38
<b>Changes in Uterine Blood Flow during the Menstrual Cycle</b> .....	36	Uterine Blood Flow and Fertilization Rate .....	39
Blood Flow Parameters in the Uterine Arteries .....	36	<b>Uterine Blood Flow in the Normal Cycle and during Ovarian Stimulation with Confirmed Ovulation</b> .....	39
Blood Flow Parameters in the Radial and Spiral Arteries .	37	Endometrial Imaging .....	39
		Conclusions .....	39

## 4 Uterine Causes of Infertility

S. Kupesic and A. Kurjak

<b>Ultrasound Detection of Uterine Abnormalities</b> . . . . .	41	<b>Ultrasound Detection of Endometrial Causes of Infertility</b> . . . . .	45
Congenital Anomalies . . . . .	41	<b>Effect of Endometrial Thickness and Morphology on Fertility</b> . . . . .	45
Endometrial Polyps . . . . .	41	Effect of Age on Endometrial Function . . . . .	47
Submucous Leiomyomas . . . . .	42	Endometrial Peristalsis . . . . .	47
Adenomyosis . . . . .	44	Cervical Factor . . . . .	47
Endometritis . . . . .	44		
Asherman Syndrome . . . . .	44		

## 5 Changes in Uterine and Ovarian Perfusion with the Onset of Menopause

A. Kurjak and S. Kupesic

<b>Decline of Fertility in the Perimenopausal Period</b> . . . . .	50	Estrogen Effect . . . . .	51
Uterine Receptivity . . . . .	50	Progesterone Effect . . . . .	52
Oocyte Quality . . . . .	50	<b>Effect of Age on Ovarian and Uterine Perfusion</b> . . . . .	52
Ovarian Function . . . . .	51	<b>Authors' Study</b> . . . . .	52
<b>Effects of Estradiol and Progesterone on Vascular Resistance</b> . . . . .	51	Interpretation of the Results . . . . .	54
Sympathetic Innervation of the Uterus . . . . .	51		

## 6 Color Doppler Sonography for the Optimization of Assisted Reproduction

D. Grab and K. Sterzik

<b>Functional Evaluation of the Endometrium</b> . . . . .	57	Results . . . . .	61
<b>Authors' Studies</b> . . . . .	58	Discussion of the Role of Doppler Examinations . . . . .	64
Patients and Methods . . . . .	58	<b>Summary</b> . . . . .	66
Examination Procedures . . . . .	58		

## 7 Pulsed Doppler and Color Duplex Sonography in the Assessment of Tubal Patency

B. Hüneke, A. Kleinkauf-Houcken, C. Lindner, and W. Braendle

<b>Applications of Doppler Sonography in Reproductive Medicine</b> . . . . .	69	Examination Technique . . . . .	70
<b>Assessment of Tubal Patency</b> . . . . .	69	Results . . . . .	73
Patients and Method . . . . .	69	Discussion of the Value of the Test Procedures . . . . .	74
		<b>Summary</b> . . . . .	75

## 8 Abnormalities of Corpus luteum Function

S. Kupesic, A. Kurjak, and T. Zodan

<b>Morphology and Biochemistry of the Corpus luteum</b> . . . . .	77	<b>Ultrasound and Doppler Sonography in the Detection of Luteal Phase Defect</b> . . . . .	79
<b>Conventional Methods in the Diagnosis and Treatment of Luteal Phase Defect</b> . . . . .	78	LUF Syndrome . . . . .	79
Possible Causes of Luteal Phase Defect . . . . .	78	<b>Blood Flow in the Corpus luteum during Early Pregnancy</b> . . . . .	81
Diagnosis of Luteal Phase Defect . . . . .	78		
Treatment of Luteal Phase Defect . . . . .	79		

## 9 Interventional Ultrasound in Reproductive Medicine

S. Kupesic, A. Kurjak, and A. K. Ertan

<b>Follicular Aspiration in Assisted Reproduction</b> . . . . .	83	<b>Fallopian Tube Catheterization</b> . . . . .	85
Transabdominal Follicular Aspiration . . . . .	83	<b>Aspiration of Ovarian Cysts</b> . . . . .	86
Transurethral Follicular Aspiration . . . . .	84	<b>Drainage of Cul-de-Sac Abscesses</b> . . . . .	86
Transvaginal Follicular Aspiration . . . . .	84	<b>Selective Reduction of Multiple Pregnancies</b> . . . . .	86
GIFT (Gamete Intrafallopian Transfer) and ZIFT (Zygote Intrafallopian Transfer) . . . . .	85	<b>Techniques of Ultrasound Tubal Imaging</b> . . . . .	87
<b>Embryo Transfer</b> . . . . .	85	Hysterosonosalpingography . . . . .	88

### Obstetric Ultrasound

## 10 Doppler Ultrasound Examinations from Folliculogenesis to Early Pregnancy

S. Kupesic, A. Kurjak, and W. Schmidt

<b>Overview</b> . . . . .	96	<b>Luteal Blood Flow in Normal and Abnormal Pregnancies</b> . . . . .	100
<b>Monitoring Folliculogenesis</b> . . . . .	96	<b>Trophoblastic Invasion and Development of the Placenta</b> . . . . .	101
<b>Development of the Corpus luteum</b> . . . . .	97		
<b>Changes in Endometrial Blood Flow</b> . . . . .	98		

## 11 Evaluation of Early Placentation and the Embryonic Circulation with Doppler Ultrasound

A. Kurjak and S. Kupesic

<b>Implantation</b> . . . . .	103	<b>Changes in Uterine Perfusion after Placentation</b> . . . . .	107
<b>Development of the Intervillous Circulation</b> . . . . .	103	Uterine Arteries and Spiral Arteries . . . . .	107
Classic Theory . . . . .	103	<b>Embryonic and Fetal Circulation</b> . . . . .	107
Objections and Alternative Theories . . . . .	104	Fetal Vessels . . . . .	108
Color Doppler Studies . . . . .	104	Summary . . . . .	109
<b>Vascularization of the Yolk Sac and Vitelline Duct</b> . . . . .	106		

## 12 Color Doppler Sonography in Ectopic Pregnancy

H. J. Voigt

<b>Importance of Transvaginal Sonography and Serum hCG</b> . . . . .	111	Diagnostic Efficiency . . . . .	112
<b>Transvaginal Color Doppler Sonography</b> . . . . .	112	Author's Studies . . . . .	112
Typical Findings in Normal and Ectopic Pregnancy . . . . .	112	Assessment of the Method . . . . .	115
		<b>Summary</b> . . . . .	115

## 13 Physiology of Doppler Flow in Maternal Vessels during Pregnancy

T. Golaszewski, J. Deutinger, and G. Bernaschek

<b>Conditions of Intrauterine Life</b> . . . . .	116	<b>Technique of Transvaginal Pulsed Doppler Flowmetry</b> . . . . .	117
<b>Physical Principles</b> . . . . .	116	<b>Authors' Studies</b> . . . . .	118
<b>Anatomical and Physiological Principles</b> . . . . .	116	Uterine Perfusion in a Normal Pregnancy . . . . .	118
Adaptive Processes during Pregnancy . . . . .	117	Uterine Perfusion in an Abnormal Pregnancy . . . . .	119
		Uterine Perfusion on Medication or following Uterine Manipulation . . . . .	120

<b>Discussion</b> .....	121	<b>Summary</b> .....	122
Uterine Perfusion in a Normal Pregnancy .....	121	Doppler Flowmetry of Maternal Vessels as a Screening Test? .....	122
Uterine Perfusion in an Abnormal Pregnancy .....	121		
Uterine Perfusion on Medication or after Uterine Manipulation .....	122		

## 14 Color Doppler Sonography of the Uterine Arteries in Early Pregnancy to Screen for Preeclampsia and Uteroplacental Insufficiency

A. Funk

<b>Applications of Color Doppler Sonography during Pregnancy</b> .....	124	<b>Early Doppler Examination of Uteroplacental Blood Flow in Abnormal Pregnancy</b> .....	126
<b>Technique of Transvaginal Doppler Sonography</b> .....	124	Patients .....	126
<b>Normal Development of Uterine Artery Doppler Spectra</b> .....	125	Results .....	127
Normal Values in Early Pregnancy .....	125	Discussion .....	127
		<b>Summary</b> .....	128

## 15 Normal Fetomaternal Doppler Indices in the Second and Third Trimesters of Pregnancy

A. K. Ertan, H. J. Hendrik, I. Tossounidis, and W. Schmidt

<b>Establishing Normal Curves</b> .....	129	<b>Results</b> .....	130
<b>Methodology</b> .....	129	<b>Discussion</b> .....	133
Defining the Normal Population .....	129	Progression of Doppler Indices during the Course of Pregnancy .....	133
Plotting Quantile Curves .....	129		

## 16 Venous Doppler Sonography

F. Bahlmann

<b>Historical Development</b> .....	135	<b>Clinical Applications</b> .....	140
<b>Physiology</b> .....	135	Intrauterine Growth Retardation Due to Chronic Placental Insufficiency .....	140
Umbilical Vein .....	135	Growth Discordance in Multiple Pregnancy .....	141
Ductus venosus .....	136	Hydrops fetalis .....	141
Inferior Vena Cava .....	139	<b>Conclusion</b> .....	143
Hepatic Veins .....	139	Other Diseases .....	143

## Specific Obstetric Problems

### 17 Color Doppler Sonography in the Diagnosis of Nuchal Cord

A. K. Ertan, H. J. Hendrik, and W. Schmidt

<b>Importance of Nuchal Cord</b> .....	148	Importance of Nuchal Cord Diagnosis in the Biophysical (ABCD) Profile .....	150
<b>Color Doppler Study on the Diagnosis of Nuchal Cord Examination Technique</b> .....	148	<b>Role of Doppler Sonography in NC</b> .....	151
Results .....	149	<b>Summary</b> .....	153

## 18 Chronic Placental Insufficiency

H. J. Hendrik, A. K. Ertan, and W. Schmidt

---

<b>Definitions</b> .....	155	<b>Clinical Management of Chronic Placental Insufficiency Suspected from Doppler Findings</b> .....	160
Definition and Incidence of Chronic Placental Insufficiency .....	155	Antenatal Fetal Heart Rate Monitoring .....	160
Intrauterine Growth Retardation .....	156	Pathological Changes in Organ Systems .....	160
<b>Diagnosis of Chronic Placental Insufficiency</b> .....	158	Biophysical Profile .....	161
Diagnostic Systems .....	158	<b>Summary</b> .....	162
Indications for Doppler Sonography .....	159	Identifying Cases with IUGR .....	162
		Obstetric Management .....	163

## 19 Severely Abnormal Doppler Findings and Perinatal Abnormalities

A. K. Ertan, H. J. Hendrik, and W. Schmidt

---

<b>Surveillance of Compromised Fetuses</b> .....	166	Reverse Flow in the Umbilical Artery and/or Fetal Aorta ..	168
<b>Absent End-Diastolic Flow (AEDF) and Reverse Flow</b> ..	166	Clinical Results of AEDF or Reverse Flow in the Umbilical Artery and/or Fetal Aorta .....	168
Technical Aspects in the Diagnosis of Absent End-Diastolic Flow and Reverse Flow .....	166	<b>Significance of Severely Abnormal Doppler Findings</b> ..	170
Absent End-Diastolic Flow in the Umbilical Artery and/or Fetal Aorta .....	168	<b>Summary</b> .....	173

## 20 Fetal Doppler Findings in Late Pregnancy

K. Vetter

---

<b>Physiological Findings in Late Pregnancy</b> .....	176	<b>Changes in Findings at Term and in Postterm Pregnancies</b> .....	178
Aorta: Quantitative Analysis .....	176	Term Effect .....	178
Aorta: Qualitative Analysis .....	176	Circulatory Balance .....	179
Cerebral Arteries .....	177	<b>Summary</b> .....	180
Renal Arteries .....	177		
Femoral Arteries .....	177		

## 21 Intrapartum Fetal Heart Rate Changes and Doppler Sonography

E. Weiss

---

<b>Pathophysiology and Technical Problems</b> .....	182	Direct Effect of Intrapartum Fetal Hypoxia or Hypoxemia on Blood Flow Patterns in the Umbilical Arteries and Vein .....	193
<b>Changes in Uterine Artery Waveforms during Labor</b> ..	183	Intrapartum Blood Flow Patterns in the Fetal Aorta .....	194
Our Results .....	183	Intrapartum Blood Flow Patterns in Fetal Cerebral Vessels .....	195
Discussion of Uterine Doppler Changes during Labor .....	185	<b>Summary</b> .....	196
<b>Intrapartum Waveform Changes in Umbilical and Intrafetal Vessels</b> .....	187		
Umbilical Cord Doppler during Labor .....	187		
Effect of Intrapartum FHR Decelerations on Quantitative Parameters of Umbilical Blood Flow .....	192		

## 22 Color Doppler Ultrasound in Fetal Echocardiography

A. Lindinger

<b>Congenital Heart Disease—Incidence and Risk Factors</b> .....	198	<b>Ultrasound Examination of the Fetal Heart</b> .....	200
<b>General Introductory Remarks on Color Doppler Sonography of the Fetal Heart</b> .....	199	Normal Findings .....	200
Indications for Color Doppler Sonography—Advantages and Limitations .....	199	Color Doppler in the Diagnosis of Congenital Heart Disease .....	205
Special Features of Fetal Echocardiography .....	199	Management of Suspected Congenital Heart Disease ....	218

## 23 Use of Color Doppler in Echocardiography

U. Gembruch

<b>Importance of Color Doppler Echocardiography in Prenatal Diagnosis</b> .....	219	<b>Anomalies of Visceroatrial Blood Flow</b> .....	222
<b>Examination of the Normal Heart</b> .....	219	<b>Anomalies of Atrioventricular Blood Flow</b> .....	223
Equipment Settings .....	219	<b>Anomalies of Ventriculoarterial Blood Flow</b> .....	224
Examination Technique .....	220	<b>Anomalies of Blood Flow through the Cardiac Septa</b> ..	225
<b>Cardiac Valve Regurgitation</b> .....	221	<b>Color Doppler Sonography in Fetal Arrhythmias</b> .....	226
Functional Physiological Tricuspid Regurgitation .....	221	<b>Summary</b> .....	227
Pathological Tricuspid Regurgitation .....	221		
Tricuspid and Mitral Valve Regurgitation .....	221		
Semiquantification of AV Valve Regurgitation .....	222		

## 24 Structure of the Human Placenta and Pathomorphological Changes in Placental Insufficiency

K. R. Reitnauer

<b>Structure of the Human Placenta</b> .....	230	Morphology and Physiological Transformation of the Maternal Basal-Plate Vessels .....	236
Weight and Dimensions .....	230	<b>Placental Insufficiency</b> .....	237
Early Development of the Human Placenta .....	230	Definition and Etiology of Placental Insufficiency .....	237
Structure of the Villous Tree .....	232	Placental Compensatory Mechanisms .....	237
Microstructure of the Terminal Villus .....	234	Classification of Placental Insufficiency by its Progression .....	238
Maturation of the Placenta .....	235	Morphological Counterparts of Latent or Overt Placental Insufficiency .....	238
Vascular Architecture of the Villous Tree .....	235		
Regulation of Villous Blood Flow .....	235		
Concept of the Placentone .....	236		

## 25 Morphological and Morphometric Studies of the Placenta with Doppler Abnormalities of the Fetal Umbilical Arteries\*

T. Hitschold

<b>Clinical Aspects of Placental Insufficiency</b> .....	249	<b>Validation of Doppler Findings by Placental Histology</b> .....	251
<b>Pathophysiological Aspects of Placental Insufficiency</b> ..	249	Resistance Index of the Umbilical Arteries .....	251
<b>Pathomorphological Aspects of Placental Insufficiency</b> .....	250	End-Diastolic Blood Flow Velocities in the Umbilical Arteries .....	252
		Clinical and Diagnostic Value of Doppler Sonography of the Umbilical Arteries .....	254

## Gynecological Ultrasound

### 26 Sonographic and Doppler Sonographic Examination of Uterine Anomalies

S. Kupesic and A. Kurjak

<b>Classification of Uterine Anomalies</b> .....	260	<b>Ultrasound in the Diagnosis and Treatment of Septate Uterus—Authors' Results</b> .....	261
<b>Diagnosis and Complications of Septate Uterus</b> .....	261	Patients and Methods .....	261
		Results .....	262
		<b>New Thoughts on Old Problems</b> .....	264

### 27 Doppler Examination of the Normal Endometrium and Benign Endometrial Changes

S. Kupesic and A. Kurjak

<b>Changes in the Normal Endometrium during the Menstrual Cycle</b> .....	266	<b>Endometrial Hyperplasia</b> .....	270
<b>Changes in Endometrial Blood Flow during the Menstrual Cycle</b> .....	266	<b>Adenomyosis</b> .....	271
<b>Submucous Leiomyomas</b> .....	268	<b>Endometritis</b> .....	272
<b>Endometrial Polyps</b> .....	269	<b>Incomplete Abortion</b> .....	272
		<b>Decidua</b> .....	272

### 28 Transvaginal Color Doppler and Pulsed Doppler Diagnosis of Benign Changes in the Uterine Myometrium

A. Kurjak and S. Kupesic

<b>Examination Technique, Anatomy, and Physiology</b> ...	274	<b>Management of Uterine Leiomyomas and the Importance of Color Doppler Sonography</b> .....	277
<b>Leiomyomas (Fibroids)</b> .....	274	Medical Treatment with GnRH Agonists .....	277
Vascularization of Leiomyomas .....	275	Surgical Treatment .....	277
		<b>Vascular Diseases in the Lesser Pelvis (Varicose Veins or Arteriovenous Malformations)</b> .....	278

### 29 Use of Color Doppler in the Evaluation of Suspicious Endometrial Findings

M. Holländer, C. Villena-Heinsen, A. K. Ertan, and W. Schmidt

<b>Incidence of Endometrial Carcinoma</b> .....	280	Resistance Indices of Endometrial Vessels .....	284
<b>Diagnostic Investigation of Suspicious Endometrial Findings</b> .....	280	Effect of Menopausal Status and Hormone Use .....	284
Color Doppler Sonography .....	280	Effect of Histopathological Parameters, with Reference to Prognostic Factors .....	285
<b>Examination of the Uterine Artery</b> .....	281	Subendometrial and Myometrial Vessels .....	286
<b>Experience at the Department of Obstetrics and Gynecology, Homburg University Hospital, Saar</b> .....	281	<b>Summary</b> .....	286
Patients and Methods .....	281		
Visualization and Morphology of the Vessels .....	282		

### 30 Malignant Uterine Tumors

A. Kurjak and S. Kupesic

<b>Endometrial Carcinoma</b> .....	288	<b>Uterine Sarcoma</b> .....	296
Incidence .....	288	Authors' Experience .....	296
Risk Factors .....	288	<b>Cervical Carcinoma</b> .....	297
Target Group for Screening .....	288	<b>Conclusion</b> .....	297
Screening: Dream or Reality? .....	288		
Authors' Experience .....	292		
Review of the Literature .....	293		

### 31 Blood Flow Changes in Cervical Carcinoma Treated by Primary Chemotherapy

C. Villena-Heinsen, A. K. Ertan, M. Holländer, and W. Schmidt

<b>Treatment of Cervical Carcinoma</b> .....	299
<b>Assessing Treatment Response with Pulsed Color Doppler Sonography</b> .....	299
Authors' Studies .....	299
Discussion .....	301
<b>Summary</b> .....	302

### 32 Color Doppler Imaging of Benign Adnexal Masses—A Spectrum of Findings

A. Kurjak, S. Kupesic, and A. K. Ertan

<b>Appearance of Normal Ovaries by B-Mode and Color Doppler Ultrasound</b> .....	304
<b>Specific Adnexal Masses</b> .....	304
Cystic and Cystic-Solid Ovarian Masses .....	304
Solid Ovarian Masses .....	307
<b>Conclusions</b> .....	308

### 33 Malignant Adnexal Tumors

A. Kurjak, S. Kupesic, and A. K. Ertan

<b>Color Doppler Sonography of Adnexal Malignancies</b> ..	310	Vascular Impedance .....	314
<b>Review of the Literature</b> .....	310	Blood Flow Velocities .....	315
Neovascularization .....	312	Stages of Malignant Tumors .....	315
Detecting Blood Vessels and Defining their Location ..	312	False-Positive Results .....	316
Vascular Patterns .....	312	<b>Conclusions</b> .....	317
Pulsed Doppler Waveforms .....	313		

### 34 Three-Dimensional Power Doppler Sonography in Evaluating the Angiogenesis of Ovarian Tumors

A. Kurjak, S. Kupesic, and B. Breyer

<b>Contribution of Transvaginal Color Doppler Sonography</b> .....	319	<b>Ultrasound Technology in Tumor Diagnosis</b> .....	321
<b>Three-Dimensional Imaging</b> .....	320	Problems in the Interpretation of 3D Power Doppler Data .....	321
Three-Dimensional Imaging of Vascular Patterns .....	320	Brief Review of the Mathematical Basis of New Technologies .....	321
Types of Image Acquisition and Equipment for Three-Dimensional Ultrasound .....	320	Current Methods for Evaluating Vascular Geometry and Function .....	322
Display Modes for Three-Dimensional Vascular Images ..	320		

Technique for Evaluating Vascular Geometry ..... 322  
 Example of 3D Power-Mode Imaging of Benign and  
 Malignant Gynecological Tumors ..... 322  
 Advances in Tumor Therapy ..... 326

**Summary** ..... 326  
 Future Outlook ..... 326

### 35 Ovarian Cancer Screening

A. Kurjak, W. Schmidt, A. K. Ertan, and S. Kupesic

**Incidence and Five-Year Survival Rates of Ovarian  
 Cancer** ..... 330  
**Requirements of a Screening Program** ..... 330  
 Definition ..... 330  
 Screening Methods ..... 331  
 Screening Parameters ..... 331  
**Possible Screening Tests** ..... 332  
 Bimanual Pelvic Examination ..... 332

Cul-de-sac Washings and Radiological Studies ..... 332  
 Tumor Marker ..... 332  
 Ultrasound ..... 333  
**Who Should be Screened?** ..... 335  
 Age Distribution ..... 335  
 Family History ..... 336  
**Conclusion** ..... 336  
 Other Risk Factors ..... 336

### 36 General Aspects of the Ultrasound Investigation of Blood Flow in Breast Tumors

C. Villena-Heinsen, M. Holländer, and W. Schmidt

**Historical Development** ..... 339  
**Specific Parameters in the Doppler Examination of  
 Breast Tumors** ..... 339  
 Blood Flow Detection ..... 339  
 Number of Tumor Vessels ..... 341  
 Resistance Index ..... 342

Absolute Velocities ..... 342  
 Number and Intensity of Color Pixels and Color Areas ... 343  
 Doppler Waveform ..... 345  
 Comparison of “Mirror Image Areas” ..... 345  
**Conceptual Misunderstandings in the Interpretation  
 of Doppler Measurements** ..... 345

### 37 Color Doppler Sonography in the Diagnosis of Breast Cancer

H. Madjar

**Evolution of Breast Cancer Diagnosis** ..... 348  
**Continuous-Wave Doppler** ..... 350  
**Pulsed Doppler Techniques** ..... 351  
**Color Doppler** ..... 351  
 Equipment Settings ..... 352  
 Examination Technique ..... 353

Blood Flow Analysis ..... 354  
 Study Results ..... 355  
 Discussion ..... 356  
**Conclusions** ..... 359

### 38 Usefulness of the Minimum Resistance Index in the Benign–Malignant Discrimination of Breast Tumors

C. Villena-Heinsen, M. Friedrich, J. König, and W. Schmidt

**Flow Resistance in Malignant Breast Tumors** ..... 360  
**Authors’ Studies** ..... 360  
 Patients and Methods ..... 360  
 Results and Discussion ..... 361  
**Summary** ..... 363

**39 Effect of Menopausal Status and Hormone Replacement on Therapy Resistance Indices and Blood Flow Velocities in Breast Tumors**

C. Villena-Heinsen, I. Tossounidis, and W. Schmidt

**Menopausal Status and Benign–Malignant Tumor**

<b>Discrimination</b> .....	364
<b>Authors' Studies</b> .....	364
Patients and Methods .....	364
Results .....	365
Discussion .....	366
<b>Summary</b> .....	370

**40 Benign–Malignant Tumor Discrimination and Prognostic Evaluation of Breast Tumors with Color Doppler Sonography**

C. Villena-Heinsen, A. K. Ertan, D. Mink, and W. Schmidt

**Applications of Color Doppler Sonography in Breast**

<b>Cancer</b> .....	371
<b>Authors' Studies</b> .....	372
Methods .....	372
Results .....	372
Discussion .....	376
<b>Conclusion</b> .....	377
<b>Index</b> .....	379
