

Table of Contents

FOREWORD by Bryce Weir	vii
PREFACE	vii
ACKNOWLEDGMENTS	ix
Anatomy	
I. Meninges	1
II. Cerebrospinal Fluid	2
III. Brain Barriers	3
IV. Blood Supply to the Brain	4
V. Blood Supply to the Spinal Cord	21
VI. Intracranial-extracranial Anastomoses	22
VII. Persistent Fetal Carotid-vertebral Anastomoses	23
VIII. Cortical Anatomy	24
IX. Diencephalon	32
X. Basal Ganglia	37
XI. Hypothalamus	39
XII. Olfactory System	41
XIII. Hippocampal Formation	42
XIV. Cerebellum	46
XV. Cranial Nerves	51
XVI. Brain Stem	63
XVII. Spine and Spinal Cord	71
XVIII. Cranial Foramina and Miscellaneous Structures	86
XIX. Orbit and Tendinous Ring (Anulus of Zinn)	92
XX. Innervation and Muscles of the Head and Neck	93
XXI. Peripheral Nerve Plexi	94
XXII. Structures to Memorize	98
Physiology	
I. Cellular Molecular Transport	101
II. Membrane Potentials and Action Potentials	102

Table of Contents (continued)

III. Synapses and Neurotransmitters	105
IV. Sensory Receptors	109
V. Nerve Transmission	110
VI. Somatic Sensations	111
VII. Vision	118
VIII. Hearing	124
IX. Taste	127
X. Smell	128
XI. Motor Systems	129
XII. Vestibular System	134
XIII. Cerebellum	137
XIV. Basal Ganglia	139
XV. Neurotransmitter Changes in Disease	140
XVI. Motor Control	141
XVII. Cortical Functions	142
XVIII. Thoughts and Memory	144
XIX. Reticular Activating System and Neurotransmitters	146
XX. Limbic System with Hypothalamus and Hippocampus	146
XXI. Brain Activity States	149
XXII. Autonomic Nervous System	151
XXIII. Cerebral Blood Flow	155
XXIV. Skeletal Muscle	155
XXV. Smooth Muscle	158
XXVI. Cardiac Muscle	159
XXVII. Circulation	160
XXVIII. Respiration	162
XXIX. Gastrointestinal Tract	163
XXX. Genitourinary Tract	165
XXXI. Temperature	166
XXXII. Endocrine	166
GLOSSARY	171
