

**FORTHCOMING****Microneurosurgery**

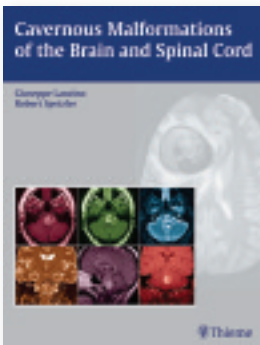

Aneurysms • Arteriovenous Malformations

**M.G. Yasargil, MD**

Named “Man of the Century” by *Neurosurgery*, the official journal of the Congress of Neurological Surgeons, Dr. Yasargil has been a pioneer in microneurosurgery for decades. The DVD presents the original video series with hours of comprehensive coverage of microneurosurgical techniques. Each video distills Dr. Yasargil’s clinical expertise, guiding the clinician step-by-step through techniques for pterional craniotomy as well as the surgical management of aneurysms and arteriovenous malformations.

**NEW****Cavernous Malformations of the Brain and Spinal Cord****Giuseppe Lanzino, MD, and Robert Spetzler, MD**

This book presents a comprehensive overview of the basic science and current clinical knowledge on cavernous malformations of the brain and spinal cord.

*Cavernous Malformations of the Brain and Spinal Cord* begins by covering general aspects of the disease, including the natural history, molecular biology, pathological processes, genetic basis, neuroradiology, and classification of cavernous malformations. Separate chapters then address the various types of cavernous malformations, thoroughly describing the clinical presentation and management approaches for each clinical situation. Incisive review of recent literature sheds light on topics of incidence, location, and outcomes. Neurosurgeons and neurologists, especially those caring for patients with seizures and hemorrhagic stroke, will benefit from the wealth of information in this complete reference.

**FEATURES**

- Clinical insights regarding indications for surgery, surgical techniques, outcomes, and prognostic factors drawn from the authors’ extensive experiences
- Discussion of treatment of patients with specific disorders, such as epilepsy
- Coverage of cavernous malformations as dynamic lesions with descriptions of de novo formation and lesions induced by irradiation
