Modern Management of Spinal Deformities
A Theoretical, Practical, and Evidence-Based Text

EDITOR
Robert Dickson

Juergen Harms
Ethianum Klinik

DESCRIPTION
Authored by two world-renowned pioneers in the field of spinal surgery, this book covers the range of spinal deformities—emphasizing scoliosis—and their etiologies, including idiopathic, congenital, neuromuscular, tumors, neurofibromatosis, and more. All too often in other works, too much attention has been focused on how to put in metalwork, without sufficiently discussing the what, when, and why. Authors Dickson and Harms provide a wealth of knowledge through experience that shows how important newer therapeutic concepts and surgical methods are, such that beyond just preventing the progression of deformity, it is now possible, with correctly performed surgery, to eliminate deformity and straighten spines permanently.

SALES HOOKS
- Major new text in spinal deformity surgery, reflecting essential and evidence-based principles and practice
- Information on new techniques, including anterior approach to the spine and techniques for children to prevent spine deformities
- Dickson and Harms are two of the most experienced names in European spine surgery

One of the most important elements in the new ABR Core and ABR Certifying Exam is the emphasis placed on noninterpretive skills in radiology. These skill sets comprise all those elements of radiology not directly related to radiologic diagnosis, and include radiation and patient safety, information on contrast agents, error prevention, patient communication, quality control, critical thinking, professionalism, ethics, and so on. The exam devotes an entire “module” is devoted to these questions. This resource helps diagnosis-focused radiologists work on the rest of their practice.

Effective from 1st January 2009

All consignments by Thieme Publishers are delivered without any automatic returns authorization provision. All returns are governed by the following rules:

General Remarks
• For all returns, authorization is granted strictly at the discretion of the publisher, except for faulty, damaged or wrongly delivered titles (see below)
• The basic principle for returns in any one year is that these should not exceed 5% of the previous year’s net turnover for any one company
• The publisher does not guarantee to send back any products that are outside these returns rules and reserves the right to destroy these without compensation.
• Transport costs for returns are covered by the sender (except for Item 4)

1) Full credit can be granted only if
• prior permission to return has been requested and authorized
• the request for permission to return states invoice number, date, and reason for return
• returns are in mint condition, without defacing marks, stickers or security devices
• the request for return authorization is made at the latest twelve (12) months from invoice date
• returns are made directly to our warehouse address

2) No credit will be granted if products are
• returned without prior authorization
• not returned in a resalable condition as described above
• not accompanied by a delivery note listing invoice numbers and dates
• old or out-of-print editions returned more than three (3) months after publication of the new edition

3) No returns can be accepted or authorized
• if made or requested later than twelve (12) months from invoice date
• if made for the previous edition of a newly published work later than 3 months from publication date
• for offline electronic or audiovisual material for continuation orders, series orders and reduced-price or special priced books or sets
• for books with a selling price value (gross) of less than Euro 50.

4) No prior permission is required for
• imperfect copies
• wrongly delivered books (publisher’s error)
In such cases, please include invoice number, date, and reason for return.
