Minimally Invasive Spine Surgery
Techniques, Evidence, and Controversies
R. Haertl, MD and A. Korge, MD

Minimally Invasive Spine Surgery: Techniques, Evidence, and Controversies is the most comprehensive book of its kind. It includes more than 500 pages of surgical techniques, illustrations, case images, tips and tricks, and research, providing an invaluable tool for spine surgeons around the world.

FEATURES:
- Objectively reviews the pros and cons of each technique
- Summarizes the spectrum of indications and contraindications
- Discusses historical and modern day controversies relating to each technique
- Chapters in the text are further supported by an evidence-based section summarizing research studies, analysis, and conclusions into each technique, from peer-reviewed journals

AOSpine Manual
Volume 1: Principles and Techniques
Volume 2: Clinical Applications
M. Aebi, MD, V. Arlet, MD and John K. Webb, FRCS

These beautifully illustrated reference volumes provide thorough coverage of the latest AO spine techniques, and feature high-quality color photographs and drawings to facilitate rapid review.

2007/1,528 pp./1,000 color illus./2 hardcover books with DVD/ISBN 978-3-13-144481-3

Introduction to Spine Surgery
Essentials for ORP, Fellows, and Residents
S. Corbett, RN

A comprehensive outline of spine surgery that will provide operating room personnel, spine fellows, and spine residents with a firm understanding of the general science concepts, equipment, and key procedures in spinal patient care.

2006/296 pp./97 illus./hardcover/ISBN 978-3-13-143351-0

Spine Classifications and Severity Measures
J. R. Chapman, MD, J. R. Dettori, PhD, MPH and D. C. Norvell, PhD

This one-of-a-kind book presents ratings and critical evaluations of the strengths and weaknesses of more than 185 spine classification and severity measures.

Spine Outcomes Measures and Instruments
J. R. Chapman, MD, et. al

An invaluable reference tool, this comprehensive book evaluates and summarizes more than 100 outcomes instruments for the spine and its associated diseases.

NEW

Measurements in Spine Care
J. R. Chapman, MD, M. Lee, MD, J. Herrmsmeyer, MD, J. R. Dettori, PhD, MPH and D. C. Norvell, PhD

This text explicitly outlines the measurement of the spine from a clinical, laboratory, and radiographic approach. A detailed description of the actual technique of measurement and the clinical implication are presented with accompanying illustrations. This amalgamation of measurement tools for the spine is a beneficial reference for a wide spectrum of healthcare providers: students, nurses, residents, fellows, and established surgeons.

The detail presented in this text will not only serve as a reference, but will also allow the reader to accurately reproduce measurement techniques, thus enhancing inter-physician communication, research of the spine, and improvement of patient care.

NEW

Essentials of Spinal Cord Injury
Basic Research to Clinical Practice
M. Fehlings, MD, et al.

Essentials of Spinal Cord Injury is written for the spinal cord injury (SCI) team and reflects the multidisciplinary nature of treating patients with SCI. This comprehensive yet concise reference will enable neurosurgeons, orthopedic surgeons, neurologists, and allied health professionals caring for SCI patients to translate research results into patient care. It is also an excellent resource for those preparing for the board exam in SCI medicine.

KEY FEATURES:
• Material is cross-referenced to highlight relationships between the different areas of SCI
• An Overview of the Literature table is provided in most chapters
• Each editor is a world-renowned expert in a core discipline involved in the management of SCI patients

Spinal Injection Techniques
T. Theodoridis, MD and J. Kraemer, MD

Written by a multidisciplinary team of experts, this book presents all of the common methods for the injection of local anesthetics to address pain from the cervical spine to the sacrum.

Spine Radiosurgery
P. C. Gerszten, MD, MPH and S. Ryu, MD

This authoritative textbook discusses the benefits and limitations of current spine radiosurgery treatments for benign and malignant spine disorders, primary and metastatic tumors, and spinal cord arteriovenous malformations.

NEW

Neurotrauma and Critical Care of the Spine
J. Jallo, MD, PhD and A. R. Vaccaro, MD, PhD, FACS

In Neurotrauma and Critical Care of the Spine – called “very informative” by the Journal of TRAUMA® Injury, Infection, and Critical Care – experts in the fields of neurosurgery and orthopaedic surgery lead clinicians through each stage of patient care.

2009/256 pp./131 illus., incl. 3 color/hardcover/ ISBN 978-1-60406-033-1

BESTSELLER

Physical Examination of the Spine
T. J. Albert, MD and A. R. Vaccaro, MD, PhD, FACS

An ideal reference for enhancing your examination skills and refreshing your understanding of frequently performed tests for the cervical, thoracic, and lumbar spine. Succinct, easy-to-understand descriptions allow for a rapid mastery of key concepts.

NEW

Decision Making in Spinal Care
Second Edition
D. G. Anderson, MD and A. R. Vaccaro, MD, PhD, FACS

The key concepts and techniques for managing complex spine conditions caused by trauma, disease, and deformity and extensive coverage of important topics including cervical and thoracolumbar trauma, degenerative/metabolic diseases, and deformities such as scoliosis.

HIGHLIGHTS OF THE SECOND EDITION:
• Focuses on must-know information that significantly impacts clinical decisions
• Includes new spinal technologies in the Contemporary Topics section to keep readers current
• Contains more algorithms, figures, and diagrams to aid understanding and facilitate rapid management guidance
• Written by world-renowned spinal care experts

Surgical Management of Low Back Pain
Second Edition
D. K. Resnick, MD, R. W. Haid, Jr., MD and J. C. Wang, MD
The second edition of this popular text provides evidence-based discussion of the indications, various techniques, and anticipated results of surgical intervention.
2009/232 pp./156 b&w illus./ hardcover/
(A co-publication of the AANS and Thieme Publishers)

Vertebroplasty and Kyphoplasty
D. K. Resnick, MD, J. D. Barr, MD and S. R. Garfin, MD
This is the first book to cover everything that is currently known about vertebroplasty and kyphoplasty, including patient selection, operative techniques, complication avoidance, management, outcomes, and more!
2005/138 pp./140 illus./hardcover/
ISBN 978-1-58890-227-65

Dynamic Reconstruction of the Spine
D. H. Kim, MD, FACS
F. P. Cammisa Jr., MD and R. G. Fessler, MD, PhD
Providing ample coverage of both anterior and posterior approaches to dynamic stabilization, this essential reference is a must-have overview of state-of-the-art technologies in spinal arthroplasty and instrumentation for dynamic stabilization.
2007/424 pp./563 illus., incl. 226 color/hardcover/
ISBN 978-3-13-142681-9

Endoscopic Spine Procedures
D. H. Kim, MD, FACS, G. Choi, MD, PhD and S.-H. Lee, MD, PhD
This concise technical guide distills the vast experience of internationally recognized spine surgery experts to provide detailed coverage of minimally invasive operative techniques for the cervical, thoracic, and lumbar spine.
2011/296 pp./625 illus., incl. 350 color/hardcover with DVD/

Spinal Instrumentation
Surgical Techniques
D. H. Kim, MD, FAC, A. R. Vaccaro, MD and R. G. Fessler, MD, PhD
This is the complete guide to all contemporary forms of spinal implant systems. It gives you the clinical guidelines you need to choose and apply the best implant for any surgical situation.
2005/1,330 pp./1,103 illus./ hardcover/
ISBN 978-3-13-141331-4

Atlas of Neurosurgical Techniques
Spine and Peripheral Nerves
R. G. Fessler, MD, PhD and L. N. Sekhar, MD, FACS
This atlas engages the full range of approaches -- anterior, antero-lateral, posterior, and postero-lateral -- for operations on peripheral nerves and in every area of the spine.
2006/1,048 pp./1,269 illus., incl. 811 color/hardcover/
ISBN 978-3-13-127531-8

Cervical Spine Surgery Challenges
Diagnosis and Management
T. J. Albert, MD, J. Y. Lee, MD and M. R. Lim, MD
Cervical Spine Surgery Challenges is a practical reference for surgeons treating patients with the full range of cervical spine disorders, including degenerative spine conditions, neoplasms, inflammatory conditions, infectious conditions, trauma, and deformities.
2008/264 pp./175 b&w illus./ hardcover/

Global Spine Journal
Editor-in-Chief: J. Wang
Vol. 3, 4 issues
plus 2 issues of Evidence-Based Spine-Care Journal
ISSN 2192-5682
Intro rate: €152 (Regular €190)
Handling charges: €72
To subscribe, visit www.thieme.com/gsj

Journal of Neurological Surgery
Editors-in-Chief:
M. Gleeson, D. Kraus, V. Rohde
Vol. 74, 12 issues
plus 2 open access issues
Intro rate: €329 (Regular €411)
Handling charges:
Germany €74, Europe €77,
Africa, Asia & Australia €84
To subscribe, visit www.thieme.com/jnls

Individual print subscriptions come with free online access (if available) to current and back issues via www.thieme-connect.com/ejournals.
For institutional sales, e-mail epproducts@thieme.de.
For sample issues, visit www.thieme-connect.com/ejournals.
Orders from individuals must include the recipient’s name and private address, and be paid by private funds. Only qualified professionals and students are eligible for individual subscriptions.

Dx-Direct Series
DX-DIRECT FEATURES:
• Presents all the cases you are most likely to encounter in daily practice
• Concise organization – each problem covered in a couple of pages
• To-the-point descriptions – ideal for rapid review
