Malignant middle cerebral artery territory infarction:

- Occurs in up to ___% of stroke patients.
- Carries a mortality of up to ___%.
- T______ herniation occurs within ___ days of stroke.
- H______ can reduce mortality to ___% among all comers.

From the Handbook:
Malignant middle cerebral artery territory infarction:
A distinct syndrome that occurs in up to 10% of stroke patients, which carries a mortality of up to 80% (mostly due to severe postischemic cerebral edema → increased ICP → herniation).

Do you know the other answers?
The impressive cadre of authors and contributors compiled a thorough text to prepare medical students and residents for common and challenging questions frequently encountered during neurosurgery rounds. The convenient, easy-to-follow Q&A format covers the diverse disciplines intertwined in the understanding, care, and treatment of neurosurgical patients.

**KEY FEATURES**
- More than 1,600 questions and answers on a range of relevant topics
- 30 featured cases with invaluable pearls and insightful discussions
- More than 175 high-quality radiographs and anatomic illustrations

**How does magnesium prevent excitotoxicity in brain injury?**
Magnesium readily crosses the blood–brain barrier (BBB) and blocks various subtypes of calcium and N-methyl-d-aspartate (NMDA) channels.

**What is the most abundant excitatory neurotransmitter in the brain?**
Glutamate.

**What happens to platelet function after a subarachnoid hemorrhage?**
It is enhanced, leading to an increase in platelet aggregates in the cerebral microcirculation.

**What happens to cerebral blood flow immediately after a subarachnoid hemorrhage?**
Decreases.

**What is GPIIb/IIIa?**
A platelet surface integrin, which is a mediator of platelet aggregation.

**Test prep, upgraded**

**Neurosurgery Rounds: Questions and Answers**
Second Edition
Mark Shaya et al.
Winter 2017/512 pp./175 illus./softcover

**One small book: all neurosurgery rounds**

**PAIR WITH**

**Fundamentals of Neurology**
Second Edition
Heinrich Mattle
Marco Mumentryal
2017/456 pp./567 illus./softcover

**Introduce yourself to clinical neurology**
With coverage including history-taking, neurological examination, ancillary tests, topical diagnosis, differential diagnosis, and various diseases and conditions, this book lucidly structures complex topics to simplify how readers learn.

**LEARN EFFICIENTLY**
- Review the vast clinical experience of two highly respected university teachers
- Enrich your reading with clear color illustrations and graphics
- Organize your processes using comprehensive tables
- Assimilate complex information efficiently with the brilliant format and structure
- Keep up-to-date with the completely revised content and enhanced layout

**Getting Ready for Brain Tumor Surgery**
Michael Sabel
2017/60 pp./60 illus./softcover

**Not in the OR? No problem! Master basic skills anywhere.**
This guide provides readers with a basic set of exercises to allow development and improvement of fine motor skills necessary for brain surgery. With illustrated text and accompanying videos, this book demonstrates how to obtain technical competence in a variety of procedures and processes.

Confront the big questions—
and manage your day-to-day life

Time and Life Management for Medical Students and Residents

Michael Sabel
2017/76 pp./softcover/
ISBN 978-3-13-241399-3 €27.99

...probably the most valuable resource you will need as you enter and begin your medical residency. This handy guide is small enough to fit into your coat pocket and become your trusted companion as you go through your daily rounds visiting your patients. — BIZ INDIA

As grueling as medical studies and training are, with appropriate discipline and time management it’s possible to stay afloat, maintain sanity, achieve goals, and still enjoy a fulfilling life. This book stimulates the thoughtful processes that nurture a healthy attitude toward organizing time so as to improve one’s own quality of life and the patient’s well-being.
