

Information for Authors

Metabolism and Nutrition in Oncology (MNO) is an open access journal covering all aspects of metabolic pathways in cancer. The journal investigates the pathophysiology of metabolic maldevelopment as well as the differentiation of metabolic pathways in healthy compared to cancerous tissues. Special attention is given to the metabolic processes in cancer and their interaction with food, exercise and pharmacologic agents – in other words, the metabolic environments which influence tumor growth and body resources.

Only manuscripts written in English are considered. When submitted, manuscripts must not have been published elsewhere or be under simultaneous consideration by another journal. *MNO* accepts original papers as well as review articles and case reports. Rapid communications are offered for short manuscripts wanting to publish results fast.

Clinical Trials

MNO supports trial registration. All trials reported must be registered at an official registry recognised by the International Committee of Medical Journal Editors, such as ClinicalTrials.gov (www.clinicaltrials.gov) or any of the primary registries on the World Health Organization's International Clinical Trial Registry Platform (www.who.int/ictrp).

Manuscript Submission

Please submit your manuscript online at: <http://mc.manuscriptcentral.com/mno>

Please follow the instructions on screen and fill in all fields. Upload tables and figures as separate files, they should not be integrated into the main document, but a list with the legends of the figures and tables should be included there. Provide graphic files with sufficient resolution: Coloured and black-white bitmaps: 300 dpi; diagrams and line drawings: 600 dpi minimum. Figures should be serially numbered with Arabic numerals. There should be a clear mark in the manuscript indicating where the figure should be inserted.

Authors are responsible for the correctness of the manuscripts and the list of references. All measurements must be in Système International (SI) units.

A. Original Articles

Original papers should deal with investigations and results of high scientific value which have not been published previously.

1. Preparation of manuscripts

The authors are asked to follow the outline set below:

Page 1: a) title, b) short running title (limit: 40 characters), c) name of the author (no titles or academic grades) and address of the institute(s) where the investigations have been carried out. Should the address of the author at the time of publication differ from the one stated in the paper, the current address should be stated in a footnote, d) complete mailing address of corresponding author including telephone and telefax numbers and e-mail addresses.

Page 2: a) an abstract containing not more than 250 words with no abbreviations, b) keywords (3–6 without repeating words in the title).

Page 3 and onwards: a) introduction also indicating the aim of the study, b) materials and methods, c) results: double presentation of data in the form of text, tables or figures should be avoided, d) discussion and conclusions, e) list of references, f) legends of tables and figures. Do include your acknowledgements in the main document

2. References

a) *Text*: Citations and references should be numbered consecutively using square brackets in the order in which they are cited in the text, followed by any in tables or legends. Do not number references under alphabetical order of authors. Do not use foot-

notes and hyperlinks. If authors are mentioned in the text, only the first author should be given followed by “et al.” whenever the reference has three or more authors.

Example: “...protein concentrations were determined according to Lowry et al. [1].”

b) *List of References*: References should be given as plain text. Do not use fields in MS Word, as these are difficult to process later. The references should be listed in numbered order according to the sequence they appear in the text. Preferably, all authors or groups of authors of each publication should be mentioned. The name of the author(s) should be followed by the full title of the paper, name of the journal in which it has been published (abbreviations according to “Index Medicus”), year of publication, volume, first and last page. Abstracts and supplements have to be indicated. Chapters from books have to be cited as follows: author(s), title of chapter, title of book, editor(s), place of publication, publisher, year of publication, first and last page of the chapter. See also the recommendations of the International Committee of Medical Journal Editors (www.icmje.org).

Examples:

1 Park HY, Lim H, Pyo H, Kwon YS. Downregulation of matrix metalloproteinase-13 by the root extract of *Caythula officinalis* Kuan and its constituents in IL-1 β -treated chondrocytes. *Planta Med* 2011; 75: 1528–1530

2 Kerner W, Pfeiffer EF. The artificial pancreas. In: Samols E (ed). *The endocrine pancreas*. New York: Raven Press, 1991: 441–456

B. Reviews

Reviews deal with previous research on a certain topic and serve to summarize current findings on the topic so far. The structure of the review will vary from an original paper according to the nature of the review.

C. Rapid Communications

Rapid Communications are completed projects of smaller scope and should contain new clinical and experimental data of immediate interest.

1. They should not exceed 2 printed pages (i.e. 6 type-written double-spaced pages in manuscript 30 lines of 60 letters each) and may include 1 table and 1 figure. The list of references at the end of the paper should not exceed 10 citations.
2. The guidelines for the structure of Short Communications are the same as for Original Articles with following exceptions:
 - a) no keywords and b) no titles of the papers in the list of references.

Article Processing Charges

An article processing charge (APC) will be charged for every accepted manuscript published in *MNO*. EUR 1.500 plus VAT are charged for original papers and reviews; EUR 1.000 for Rapid Communications and Case Reports. Payment methods are agreed during the submission process. An article will be published once payment has been received.

You may want to contact your funder about covering these costs. Many grant-giving bodies have special funds reserved for APCs.

Proofs and Reprints as PDF File

Galley proofs will be sent to the corresponding author as a PDF file.
