Index

(page numbers in bold denote tabulated information)

A

abetalipoproteinemia 91
access (sterile), copper-containing intracellular foreign body 177
achromatopsia
nystagmus 86
stationary cone dysfunction 218
acute posterior multifocal pla- coid pigment epitheliopathy (APMPE) 25, 38
scars, typical forms 25
acute retinal pigment epithelitis 39
adenocarcinoma, paraneoplastic syndrome 85
adult vitelliform macular dystrophy 66–67
differential diagnosis 67
incidence 65
advanced glycation end-products (AGEs) 138
age-related macular degenera- tion (AMD) classification 47
disciform lesions 52
dry and wet forms 48–50
early stage 52–53
fibrovascular RPE detachment 50, 143
Julius–Kuhn degeneration 52
late leakage of undetermined source (LLUS) 50
macular edema, from choroi- dal neovascularization (CNV), serous RPE detachment 50
age-related maculopathy, drusen at posterior pole of eye 48
albinism 96–97
nystagmus 86
ocular 96–97
ocular hemangioblastoma 96–97
alpha-tocopherol (vitamin E), treatment of drusen 48
amaurotic cat’s eye 167–68
amblyopia 213
anemia, thin vessels, pale fundus and occasional retinal bleeding 132
aneurysms
capillary 138–44
multiple Leber miliary aneu- rysms 129
nonproliferative diabetic reti- nopathy 139
solitary retinal macroaneu- rysms 129
angiod streaks 94–95
associated diseases 95
Gromb–Strandberg syndrome 95
anigmatosis retinae 130–131
aniridia
nystagmus 86
retinal vessels in macular aplasia 128
anterior chamber, biopsy 19
anterior ischemic optic neuro- pathy (AION) 190–191, 196
vs polyarteritis nodosa 166
anterior uveitis, with choriore- tinopathy 40
aphakia/pseudophakia (Iri- ne–Gass syndrome) 43
appearance of retinal and cho- roidal disorders
blurred, fluffy, white focal lesions 26–41
choroidal tumors 19–22
macular dystrophies with mottled lesions 65–70
macular pigmented/depig- mented focal lesions 59–65
macular proliferation and holes 55–58
macular prominence 42–55
peripheral lesions 104–110
pigment changes with large areas of dystrophy 79–103
retinal detachment 110–118
retinopathy with focal or mottled lesions 21–26
yellowish-white exudative retinopathy 71–79
see also headings above
appearance of vitreous see vitreous body
areolar atrophy 48
arteriosclerosis
arteriovenous crossing signs in retinal venules 131
choroidal, with bright vascular bands and thin columns of blood 132
differentiation from hyper- tension 133
wide and irregular reflexes in retinal arterioles 131
arteritic anterior ischemic optic neuropathy (temporal arteritis) 191–2, 196
Aspergillus infections 32–33, 74
atrophic, and pigmented areas 80–81
B
Bassen–Kornzeig syndrome
(abetalipoproteinemia) 91
Batten–Mayou lipofuscinosis 101
“bear paws” 106
Bech{c}et disease 163–164
Berlin edema in fundus 76
Best disease 66–67
incidence 65
biopsy 19–20
anterior chamber 19
tumors 20
vitreous body
biotinidase deficiency 204–206
birdshot retino(chorioido)pathy 39, 165–166, 173
scars, typical forms 25
bleeding see retinal hemorrhages
blood pressure, retinopathy of pregnancy 137
blue cone monochromatism, nystagmus 86
blurred appearance, optic disc see optic disc edema
blurred, fluffy, white focal lesions 26–41
disseminated retinocchoroidi- tis 29–33
early tumor metastases initi- ally still flat 36
internal ophthalmomysisis 34
presumed ocular histoplasmo- sis syndrome (POHS) 37
recent scars from laser, dia- thermy or cryotherapy 26
small retinal tumors 33
“bone-spicule” pigmentation 88
Bouvilie disease 33
branch retinal artery occlusion 78–79
branch retinal vein occlusion 148–150
significance of fluorescein angiography 149–50
breast carcinoma 112
choroidal metastases 122
choroidal inflammations 85
choroidal metastases 122
paraneoplastic syndrome 85
branchial carcinoma 122
brown tumor, Coats disease 125–126
Bruch membrane tears 61
bull’s eye dystrophy 63–64
and pigment degeneration 101
butterfly dystrophy 61–62
cancer-associated retinopathy (CAR) 83–86
Candida infections 32, 74, 175
canthaxanthin retinopathy 23
choroidal atrophy 62
choroidal vessels and thin vessels, minimal microvacuolation and pale fundus 132
central areolar choroidal dystrophy, incidence 65
central areolar macular atrophy 62
central retinal artery occlusion 77–78
ischemic edema 76–77
risk factors 77
central retinal vein occlusion (CRVO) 145–148
complications 148
diagnosis 149–50
differential diagnosis 151
epidemiology and risk factors 145–146
fluorescein angiography 149–150
ischemic with many cotton-wood spots 146–148
macular edema 45
nerve fiber layer 45
nomenclature and systematic classification 145
nonischemic, retinal hemorrhages 146
rheological abnormalities resembling CRVO 150–151
central serous chorioretinopa- thy 45–6
ceroid lipofuscinosis 101
chalcosis 174
cherry-red spot 78
defined 77
cholinergic response 213
pediatric dysorphies and maculopathies 98–104
see also infants and newborns
choroidochoroidal atrophy, in CMV
retnitis 79
chorioretinitis
scars 25, 80, 83
see also retinocchoroiditis
cholesterol retinopathy with anterior uveitis 40
choroidal arteries and veins 127
choroidal arteriosclerosis 132
choroidal atrophy, in myopia 24
choroidal coloboma 24
nystagmus 86
toxoplasmosis 30
choroidal detachment 117–118
differential diagnosis 118
choroidal atrophy 117–118
choroidal dystrophy, pigment changes 79–104
choroidal folds 58
choroidal granuloma, inflam- matory 51
choroidal hemangioma 120
choroidal melanoma 119–120
differential diagnosis 118
choroidal metastases
differential diagnosis 118
initially still flat 36
malignant thoracic tumors 122
TM classification 119
choroidal neovascularization (CNV)
associated disorders 54
classic vs occult 49
macular edema 47–54
ophthalmoscopie 49
choroidal nevus 106–107
choroidal sclerosis, with bright vascular bands and thin columns of blood 132
choroidal tumors 119–122
malignant melanoma
119–120
tumors, malignant thora-
cic tumors 122
TNM classification 119
choroidal vessels 127
choroideremia 93–94
choroiditis
multifocal inner choroiditis
(MIC) 40
scars, typical forms 25
serpiginous 74–75
see also disseminated retino-
choroiditis; retinocchoroiditis
chronic cellular and fibrous
infiltratar, vitreous body
172–174
chronic myeloid leukemia,
cokade hemorrhagic lesions
151
chronic serous chorioretinopa-
thy 47
cilioretinal artery 128
contusion 82
cotton-wool spots
contusion 82
crossing sign, Salus 131
Farnsworth–Munsell test 218
ferrous intraocular foreign
body, rusting 111–113
ferrous intraocular, rusting
fundus 130
fundus photography 8
fused retina 69
flecks, pigmented, fundus
106–110
floaters 171, 213
fluorescein angiography 11–12
densitometry 12
fluorescein angiography 11–12
dense arteriolar wall thick-
ening 151–152
fluorescein angiography 11–12
dense arteriolar wall thick-
ening 151–152
fluorescent hydrocarbon,
dispersal posterior retinal detac-
hment 115
fluorophotometry 13
focal lesions see blurred, fluffy,
white; macular
fluorescein angiography 11–12
dense arteriolar wall thick-
ening 151–152
fundus Flavimaculatus 69
fundus photography 8
fundus vessels, ophthalmosco-
ic structure 127
G
galactosylceramide lipidosis 100
Gass classification, macular
plication and holes 56
Gaucher disease (glycosylcera-
mide lipidosis) 100
giant cell arteritis, optic disc
edema 191–192
glycation end-products, advan-
ted 132
glycation end-products, advan-
ted 132
glycylsphingosine lipidosis 100
GM1 gangliosidosi
see also pigment changes
fundus albipunctatus with
cone dystrophy 96
in congenital stationary night
blindness (CSNB) 95
fundus changes
arterial hypertension 134
classification 136–137
Berlin edema 76
bull’s eye and pigment dege-
nation 101
hemoglobin disorders
153–154
hypertensive retinopathy 134
pigmented flecks and fields
106–110
scattered with large areas of
dystrophy 79–104
albinism 96–97
atrophic and pigmented
areas 80–81
basic-associated retinopa-
y 83–86
cherry-red spot (spingol-
olipidosis) 99–100
fields with coarse pigmen-
tion/depigmentation 82–83
pediatric dystrophies and
maculopathies 98–104
pigment degeneration
102–103
rare types, incidence 86
see also pigment changes
fundus Flavimaculatus 69
fundus photography 8
fundus vessels, ophthalmosco-
ic structure 127
E
Eales disease 151, 153, 161–162
differentiation from retinal
periphlebitis 151, 162
peripheral neovascularization
160
peripheral vascular oblitera-
tion 161
Echinococcus (dog tapeworm)
34
eclampsia, retinopathy of preg-
nancy 137
see also pigment changes
fundus albipunctatus
with cone dystrophy 96
in congenital stationary night
blindness (CSNB) 95
N
necrotizing retinitis 71–72
scars, typical forms 25
neovascularization
capillary aneurysms and hard
exudates 138–144
ischemic ophthalmopathy,
thin vessels, minimal micro-
vasculature and pale fundus 132
optic disc (NVD) and else-
where (NVE) 141
peripheral 155–160
proliferative diabetic retino-
pathy 141–143
vitreous body, proliferative –
retinopathy 169–171
see also choroidal neovascular-
ization (CNV)
nerve fibers, interferometry 10
neuroretinitis, diffuse unilateral
subacute (DUSN) 35
newborns see infants and new-
borns
Niemann–Pick disease (spin-
gomyelin lipidosis) 100
night blindness
congenital stationary 91, 95, 209
with hereditary deficiency of
retinol-binding protein
219–220
normal color vision 217
normal fundus, visual impair-
ment 213–220
normal optic disc, visual
impairment 214–217
Norrie disease, leukocoria 168
nystagmus
idopathic 86
isolated familial 86
small-amplitude, high-fre-
cquency, diagnoses 86

O
obesity, central retinal artery
occlusion 77
objective imaging studies 8–13
ocular siderosis 173, 176
ocular-cerebral lymphoma 35
oculocerebral lymphomas 173
onchorheicasis 83
opacities, vitreous body
167–168
ophthalmoscopic structure,
fundus vessels 127
ophthalmonymyosis 34
ophthalmoscopy 7
clinical diagnostic examina-
tion technique 7
contact optics with deflecting
mirrors 7
direct and indirect ophthal-
moscopy 7
high refractive power lenses
with slit lamp 7
infants and newborns 7
scanning laser ophthalmosco-
py 8–10
optic disc
anomalous tissue on/adjacent
209–212
persistent embryonic tissue
210
neovascularization (NVD), and elsewhere (NVE) 141

partially atrophy 214–215
persistent hyaloid artery
168–169
optic disc coloboma 211
optic disc edema 181–196
arterial hypertension 183–184
bilateral 181–189
acute nutritional optic neu-
ropathy 186–187
amiodarone therapy 189
hyperopia – pseudopapillitis
188
Leber optic neuropathy 187
optic disc drusen 188
papilledema with idiopathic
IC hypertension 182–183
papilledema with increased
ICP 182–183
tobacco-alcohol amblyopia
186–187
causes 181
secondary to posterior seg-
ment disorders 195–196
central retinal vein occlu-
sion 195
leukemic infiltration 195
uveitis 195
unilateral 189–195
arteriosclerotic optic neuro-
pathy 190–191
differential diagnosis 196
inflammatory optic disc
edema 192–195
temporal arteritis – Horton
disease 191–192
optic disc hemangiomia 210
optic disc osteoma 211
optic nerve 181–212
anomalous tissue on/adjacent
optic disc 209–212
compression neuropathy
215–217
harmless anomalies 181
hypoplasia, nystagmus 86
tests 215
see also optic disc edema;
optic nerve atrophy
optic nerve atrophy 196–206
complete atrophy 202–203
diagnosis 196–197
hereditary atrophy 203–206
partial/localized pallor
199–200
age-related optic disc atro-
phy 200
borelision 201
compressive optic neuropath-
hy 201
diffuse pallor 200
other regional pallor
199–200
secondary to various lesions
and disorders 201–202
syphilis 201
pathogenesis 198–199
optic nerve excavations
206–209
optic pit 209
physiologic cupping 206–207
differential diagnosis 208
glaucoma 207–208
myopia 207
optic neuritis 192–195, 214–215
causes 193–194
differential diagnosis 196
and multiple sclerosis, tem-
poral pallor of optic disc
199 treatment 195
optic pit 209
optical coherence tomography
(OCT) 9
orbits, computed tomography
216
osteoma 121

P
papilledema
defined 181
unilateral 195, 196
papillitis 192–195
paraneoplastic syndrome (can-
cer-associated retinopathy)
83–86
tumors 85
paraproteinemia, Waldenström
macroglobulinemia 151
parasites, focal lesions 33–35
pars planitis, intermediate
uveitis–pars planitis 45
pattern dystrophies 61–62
incidence 65
neovascularizations and
maculopaties 98–104
peripheral neovascularization
155–160
Eales disease 160
peripheral retinal and choroidal
lesions 104–110
peripheral vascular oblitera-
tion, Eales disease 161
peripapillitis 151
perivascular infiltrates 161–166
retinal peripheral vasculopathy
162–163
persistent embryonic tissue,
optic disc 210
persistent hyaloid artery
168–169
phytanic acid, Refsum disease
90–91
pigment changes 79–104
fields with coarse pigmentation
and depigmentation 82–83
flecks and fields at level of
fundus 106–107
with large areas of dystrophy
79–103
scattered with large areas of
dystrophy see fundus changes
sharply demarcated
bright and pigmented areas
23–25
choroidal atrophy in myo-
pia 24
choroidal coloboma 24
posterior staphyoma in myopia
23
scars from chorioretinitis
(yellowish-white) 25
white mottled deposits 20–23
canthaxanthin retinopathy
23
druses in retinal pigment
epithelium 20–22
hard exudates occurring
secondary to vascular disor-
ners 22–23
yellowish-white exudative
retinopathy 71–72
see also fundus changes
pigment crescent 209–210
placoid pigment epitheliopathy,
acute posterior multifocal
(APMPPE) 25, 38
plasmacytoma
paraproteinemia 151
retinal hemorrhages 152
polyarteritis nodosa 166
polyethylenoma
differential diagnosis 151
engorged blood vessels 125, 151
pork tapeworm (Taenia solium)
34
posterior ischemic optic neuro-
pathy (PION) 215
posterior staphyoma, in myo-
pia 23
posterior uveitis
cystoid macular edema 43–44
vitreous infiltration 172
posterior vitreous detachment,
subjective perceptions 171
Potts syndrome, scars, typical
forms 25
pregnancy, retinopathy of preg-
nancy, cotton-wool spots and
retinal edema 137
presumed ocular histoplasmo-
sis syndrome (POHS) 37
progressive cone–rod dystro-
phies, nystagmus 86
progressive retinal degenera-
tion in both eyes 83–86
proliferative diabetic retinopa-
thy (PDR) 141–143
blood vessels in vitreous body
169–171
proliferative retinopathy, disor-
ders with 171
proliferative vitreoretinopathy
(PVR) 114–115, 169–171
comparison of retinal detach-
ments 115
prostatic carcinoma, paraneo-
plastic syndrome 85
pseudoaphakia (Irvine–Gass
syndrome) 43
punctate inner choroidopathy
(PIC)
punctate retinopathy 91–92
Purtscher retinopathy 138

R
RB4 gene 220
Refsum disease 90–91
respiratory distress syndrome,
peripheral neovascularization
155–160
retina
abnormal vessels 128–131
broad gray bubble-like bul-
ging of retina 110–116
peripheral neovascularization
155–160
retina-specific antigens 83
retinal angiopathy, traumatic
132
retinal arteries
branch retinal artery occlu-
sion 78–79
see also central retinal artery
occlusion
retinal arterioles 127
in arterial hypertension 133
atypical branching 128
indicator of systemic changes
133
macular aphasia 128
narrowed caliber in hyperten-
sion 133–134
vs retinal venules 127
wide and irregular reflexes in arteriosclerosis 131
see also retinal vessels
retinal bleeding 145–154
see also retinal hemorrhages
retinal blood vessels
abnormalities 128–131
arterial hypertension 133
arteries and venules 127
characteristics, arterioles vs venules 127
macroneurysms 129–130
macular aplasia 127, 128
pathophysiology in arterial hypertension 133
variants in course 128
see also arterioles; retinal arteries; veins; venules; retinal vasculitides
retinal degeneration and dystrophy, rare types 86–96
retinal detachment 110–118
chronic 116
differential diagnosis 116, 118
glassy, transparent 116–117
gray bullous with hole/tear 110–111
gray bubble-like bulging 110–111
macular bleeding following anemia 132
many cotton-wool spots 111–113
parkinsonian 113–115
rhegmatogenous 111–113
tractional 113–115, 141–143
ultrasoundography, diagnosis 116
retinal dystrophy, pigment changes 79–104
retinal edema, retinopathy of pregnancy 137
retinal granuloma, inflammatory 31
retinal hemorrhages 145–154 in anemia 132
branch retinal vein occlusion 148–9
central retinal vein occlusion, many cotton-wool spots 148–149
central retinal vein occlusion (CRVO) 145–151
nonischemic 146
cockade hemorrhagic lesions in chronic myelosis 151
cockade lesions in chronic myelosis 151
cotton-wool spots, hard exudates and retinal edema 135–136
list of disorders 145
macular bleeding following valsalva maneuver 152
multiple myelomas, large areas of bleeding (plasmacytoma) 152
peripheral vascular obliteration 161
region drained by retinal veins 145–146
and retinal edema 135–136
sickle-cell anemia 153
subretinal 118
thin vessels, pale fundus in anemia 132
Waldenström macroglobulinaemia 152
retinal holes and tears 105
retinal macroaneurysms, solitary 129
retinal periphlebitis 173
differential diagnosis 151, 162
perivasculare infiltrates 162–163
retinal pigment epithelium (RPE)
diffuse retinal pigment epithelitis 39
atrophy 219–220
drusen 21–23
fibrovascular RPE detachment 50, 143
hyperplasia 106
hypertrophy 106
pigmented flecks and fields 106–110
serous RPE detachment 50
macular edema in AMD 50
retinal splitting see retinoschisis
retinal tumors 33, 126–126
blurred, fluffy, white focal lesions 33
retinoblastomas 123–124
incipient retinoblastomas 33
tuberous sclerosis–Bournville disease 33
retinal vasculitides 151
Behcet disease 163–164
inflammatory infiltration 163
macular edema 45–47
sarcoidosis 165
retinal vein occlusion see branch retinal vein occlusion; central retinal artery occlusion
retinal veins
branch retinal vein occlusion 148–150
occlusion, significance of fluorescein angiography 149–150
see also central retinal vein occlusion (CRVO); retinal blood vessels
retinitis, see also uveitis
retinitis pigmentosa 87–90
atypical forms 91–93
autosomal dominant retinitis pigmentosa (adRP) 89–90
autosomal recessive retinitis pigmentosa (arRP) 90
heredity and gene defects 89
incipient 219
punctate retinopathy 91–92
retinopathy punctata alba 92–92
sectorial and unilateral 91
X-linked pigmentosa 90
retinitis sclopetaria 82
sarcoidosis 31–32
scarring 83
see also disseminated retinochoroiditis
retinocarcinoiditis juxtapapillaris 30
retinobinding protein 219–220
hereditary deficiency 219–220
retinopathy punctata alba 91–92
retinopathy with focal or mottled lesions 21–23
sharply demarcated, bright and pigmented areas 23–25
retinopathy of pregnancy, cotton-wool spots and retinal edema 137
retinopathy of prematurity 155–160
epidemiology and prophylaxis 157–158
stages 156
juvenile (adults) 159–160
retinocytosis 116–117
incidence 65
X-linked juvenile 107–108
retinal optic neuritis 214–215
temporal pallor of optic disc 199
retrorenal fibroplasia 159
rhematogenous retinal detachment 111–113
rhegmatogenous retinochoroiditis, scars, typical forms 25
rheumatoid arthritis 85
sarcoidosis 31–32
scars, typical forms 25
solitary retinal macroaneurysms 129
Sorsby macular dystrophy 68
shingiopodloides, cherry-red spot 99–100
overview 99
shingliopodiosis 100
Sjogren syndrome 100
Sjogren–Lutherski syndrome 100
Stargardt disease 68–70
ELOVL4 gene 70
incidence 65
incipient 218
