contrast spread, local anesthetic distribution
anterior sciatic nerve block, 140
axillary block, 63, 64
distal sciatic nerve block, 173
femoral nerve block, 119
interscalene plexus, 20
Mansur parasacral sciatic nerve block, 158
obturateur nerve block, 189
perivascular axillary plexus technique, 60
psoas compartment and sciatic nerve block, 109
psoas compartment block, 103, 104
Raj technique, 46
suprascapular nerve block, 53
vertical infraclavicular block, 41
coracoid process, 34, 38–39

cubital fossa, 74, 76, 77
cuff pressures, ankle blocks, 212–213
diaphragm
contraction, in interscalene block, 7 elevated, 27
twitching, see hiccup
distal sciatic nerve block, 160–174
effectiveness, 170–171
lateral approach, 165–167
and lower leg amputation, 172
needle positioning, 163–164
posterior approach, 160–165
and saphenous nerve block, 173, 174
distribution of local anesthetic, see contrast spread
documentation, regional pain catheters, 244
Doppler vascular ultrasound, 226, 227
dorsal technique, brachial plexus block, 21–23
dorsiflexion of foot
and common fibular nerve stimulation, 199
and deep fibular nerve block, 210
and sciatic nerve stimulation, 135
dorso-dorsal technique, sciatic nerve block, 142–145
dosages, local anesthetics, 218–219, 237–238
long-term, 239–240
double-click, in femoral nerve block, 112, 117, 124
Dupré technique, axillary blocks, 65–70

E
elastomer pumps, 239–240, 241, 242, 243
epidermal anesthesia, and psoas compartment block, 104–105
epidermal anesthesia, and psoas compartment block, 104–105
elbow
anatomy, 74, 78
indications for block, 239
selective blocks, 73–80
electrocardiography, monitoring, 225
gangrene
diabetic, 167
foot, 212
and toe blocks, 214
gastrocnemius
and common fibular nerve, 198, 199
and saphenous nerve, 192, 193
genitofemoral nerve, 89, 94
hand, indications for block, 239
hearing loss, 26
hematoma
and psoas compartment block, 104, 108
subfascial, 221
hiccup, in interscalene block, 14, 16
hip arthroplasty, 239
hip surgery, and psoas compartment block, 108
hoarseness, 47
Horner syndrome, 7, 26, 27, 47
humerus, and selective radial nerve block, 71–73
hygiene requirements, 224
idiopathic neuritis, 221
iliac crest
infiltration, 180–182
and lateral cutaneous nerve of thigh, 176, 177
iliohypogastric nerve, 89, 94
ilioinguinal nerve, 94
iliopectineal arch, see arcus iliopectineus
incomplete peripheral nerve blocks, 218
indications
ankle blocks, 212
anterior sciatic nerve block, 129, 136
continuous peripheral nerve blocks, 239–240
femoral nerve block, 121
fibular nerve block, 200
infracravicular techniques, 46
obturateur nerve block, 187
proximal dorsal sciatic nerve block, 152
saphenous nerve block, 196
sciatic nerve blocks, 166–167
indwelling catheter
anterior sciatic nerve block, 137
axillary block, 61, 63, 64
distal sciatic nerve block, 165
Meier technique, 17
perivascular axillary plexus technique, 61
Raj technique, 45, 46
vertical infraclavicular block, 39
see also catheters
infection
and catheters, 243
and peripheral nerve blocks, 222
informed consent, 225
