Contents

Foreword

Part A The Basics

Introduction ........................................... 2

The Focus ........................................... 5
Definition ........................................... 5
Clinical Implications .............................. 6
An Example from My Practice ............... 7
Focal Activity—Some Basics .................. 7
Huneke’s Phenomenon: The Immediate Reaction .... 11

Potential Foci .................................... 15
Paranasal Sinuses ................................. 16
Tonsils ............................................ 16
Appendix ......................................... 17
Temporomandibular Joint .................... 17
The Teeth as Foci ................................. 18
Teeth with Inflamed or Decayed Pulp ............ 18
Root Canal Therapy of Devitalized Teeth .... 20
Root Remnants in the Jaw ..................... 21
An Example from My Practice ............... 21
Displaced Teeth and Impacted Wisdom Teeth .... 23
Foreign Bodies ................................... 23
Cysts in the Jaw Region ....................... 23
Chronic Gnathitis Following Tooth Extraction or Surgery .... 24
Diseases of the Marginal Periodontium ...... 25
The Link to Traditional Chinese Medicine .... 26
Scars Acting as Foci ............................ 26
Scars Located on a Meridian ................. 28
Fresh Scars and Meridianitis ............... 30
An Example from My Practice ............... 31
Intestinal Dysbiosis ............................ 33
Gastrointestinal Allergy and Migraine ......... 35
Substance Intolerance ......................... 36
Other Potential Foci ............................. 37
An Example from My Practice ............... 38

Test Procedures for Focal Disturbances ............ 41
The Role of Ear Acupuncture in the Testing for Foci .... 41
General Remarks Regarding the Testing ...... 43
Test Procedure for Foci According to Bahr—An Overview ........ 46
Focus Diagnosis for Beginners (Level 1) ........ 46
More Advanced Focus Diagnosis (Level 2) ....... 47
Where to Start .................................... 47
Comparison of the Various Methods for Focus Diagnosis and Therapy ... 48

Part B Practical Application

Learning and Mastering Knowledge
Level 1 ............................................. 54
Focus Diagnosis by Means of Ear Reflex Zones ........ 54
Essential Requirements ....................... 54
Grounding ......................................... 55
Finding the Ear Points ......................... 56
Mechanical Search for Points .................. 57
Locating Points with the Stirrup Probe ....... 57
Locating Points with the Pressure Probe ....... 59
Locating Points with an Electrical Device .......... 60
The Basics of Locating Points Electrically ........ 61
Procedure for Locating Points with the Electrical Point-Finder .... 63
Sources of Error during Electrical Point Measurement .......... 66
Suitable Point-Finding Devices ............... 68
Preliminary Examination ....................... 69
Locating Focus Points on the Ear ............. 70
An Example from My Practice ............... 71
The Special Case of Amalgam ................. 71
Mental Fields of Disturbance .................. 72
Practical Approach at Knowledge Level 1.................. 73
Summary of Diagnostic Steps at Knowledge Level 1.................. 76

**Focus Therapy Via Ear Reflex Zones** ............ 77
Therapeutic Principle .................. 77
Needling the Ear Reflex Zone That Corresponds to the Focus .......... 77
Infiltrating the Focus with a Local Anesthetic ............. 77
Laser Treatment Using Specific Frequencies ............... 79
Therapeutic Procedure .................. 80
Sieve Method .................. 81
Moxibustion .................. 81
Additional Ear Points for Focus Therapy .................. 82
How to Proceed in Case of Amalgam Load .................. 83
Mental Fields of Disturbance ............. 84
A Note Regarding Therapy in a Left-handed Person .................. 84
Practical Tips for Therapy .................. 85
Measures Supporting the Therapy ............. 85
Massage of Acupuncture Points by the Patient .................. 86
Transcutaneous Nerve Stimulation .................. 86
Improving Muscle Balance and Stability .................. 88
Diet .................. 88
Problems during Therapy .................. 89
No Improvement of Symptoms ............. 89
The Focus Cannot Be Eliminated ............. 89
Ear Inflammation Due to a Permanent Needle .................. 90
Condition after Otoplasty .................. 90
Uncertain Handedness .................. 91
Initial Aggravation .................. 91
Fear of Needles .................. 91
The Course of Therapy .................. 92
Summary of Therapeutic Steps at Knowledge Level 1 .................. 92
Notes Regarding Acupuncture Needles .................. 93
Disposable Needles .................. 93
Reusable Needles .................. 94
Permanent Needles .................. 95
Range of Uses for Permanent Needles .................. 96
Covering the Permanent Needle .................. 97
Stimulation of the Permanent Needle .................. 97
Other Systems of Permanent Needles .................. 98
Essential Equipment .................. 99

**Learning and Mastering Knowledge Level 2**

**Focus Diagnosis under Vascular Autonomic Signal Control** ............ 101
Overview .................. 101
The Vascular Autonomic Signal (Nogier’s Reflex) ............. 103
Discovery of the VAS .................. 103
The Basics .................. 104
Technique of Palpating the VAS ............. 108
Sources of Error When Palpating the VAS .................. 112
The Electric Hammer (3-Volt Hammer) .................. 113
The Five Focus Indicator Points According to Bahr ............. 115
Focus Indicator Point Type 1: Histamine Point (Synonym: Allergy Point 1) .................. 118
Focus Indicator Point Type 2: Endoxan Point (Synonym: Allergy Point 2) .................. 120
Focus Indicator Point Type 3: Point PGE1 .................. 121
Focus Indicator Point Type 4: Vitamin C Point .................. 122
Focus Indicator Point Type 5: Laterality Point (Synonym: Ginseng Point) .................. 122
Locating the Focus Indicator Points .................. 124
Assigning the Foci Belonging to the Focus Indicator Points .................. 125
Cable Method .................. 125
Other Applications of the Cable .................. 129
The Phenomenon of Local Resonance .................. 130
Grounding .................. 135
Preliminary Examination .................. 135
Determining Laterality .................. 135
Obstacle to Laterality .................. 135
Therapy: Diagnosis and Therapy .................. 136
Examination for Oscillation........137
Suppression of Oscillation........139
Method of Detecting the Cause of Oscillation........140

Focus Therapy under Vascular Autonomic Signal Control ..........144
Therapeutic Principle ........144
Needling of the Ear Reflex Zone That Corresponds to the Focus ........144
Infiltration of the Focus With a Local Anesthetic ..........148
Dry Needling of the Affected Focal Site on the Body ........149
Combination of Methods ........149
Sieve Method ..........150
Moxibustion ..........150
Monitoring the Therapy ........151
Immediate Checking ........151
Monitoring the Course of Therapy ........151
Procedure in Case of Amalgam Load ....153
Additional Points for Focus Therapy ........154
Mental Fields of Disturbance ........155
Problems during Therapy ........155
Measures Supporting the Therapy ........156
Long-Term Course of the Therapy ........156

VAS Method:
Case Histories from My Practice ........158
Shoulder Pain Due to a Dental Focus ....158
Chronic Back Pain Due to Impacted Wisdom Teeth ........159
“Meridianitis” ........160
Migraine Therapy—A 5-Year Follow-up ........163
Posttraumatic Migraine ........164

Optimizing the Methods ........166
Tools to Improve the Diagnostic Procedure ........166
The Three Tissue Layers ........166
Deep Tissue Layer ........167
Intermediate Tissue Layer ........167
Superficial Tissue Layer ........167
Examining the Tissue Layers ........168
Examining the Deep Tissue Layer ........168
Examining the Intermediate Tissue Layer ........168
Examining the Superficial Tissue Layer ........170
Checking for Inversion ........171
Checking for Inversion on the Right Side ........172
Checking for Inversion on the Left Side ........172
Procedure in Case of Inversion ........173
Monitoring the Treatment for Inversion ........174
Determining Laterality ........174
Preliminary Examination with the 9-Volt Rod ........176
Examination Procedure ........177

The Laser in Focus Diagnosis and Therapy ........178
Application of the Laser ........181
Finding Focus Indicator Points with the Laser ........181
Focus Diagnosis with the Laser ........182
Focus Therapy with the Laser ........184
Hidden Dental Foci ........185
Complete Examination Procedure ........187
Therapy of a Dental Focus ........187
Equipment ........189

Other Applications of the Vascular Autonomic Signal ........196
VAS in Orthopedics ........196
VAS in Neural Therapy ........200
VAS in Allergy Treatment ........202
VAS in Dentistry ........203

Other Applications of Ear Acupuncture ........204
Symptomatic Therapy ........204
Focus Diagnosis and Therapy ........204
Functional or Constitutional Therapy ........205
Indications for Ear Acupuncture Therapy ........205
Contraindications for Ear Acupuncture Therapy ........207

Ear Acupuncture:
Case Histories From My Practice ........209
Back Pain Following Ankle Surgery ........209
Hay Fever in a Child ........212
Unclear Pain in the Knee ........213

Focus-Relevant Reflex Localizations on the Auricle ........216
Overview ........216
Part C Training, Equipment, and Practical Aids

Training ........................................ 232

Courses for Focus Therapists at the German Academy of Acupuncture and Auriculomedicine 233
Level 0—Introductory Course on Ear, Body, and Scalp Acupuncture .... 233
Level 1—Crash Course on Ear, Body, and Scalp Acupuncture for Beginners 233
Level 2—Crash Course on Scientific Ear Acupuncture for the Moderately Advanced ........................................ 234
Level 3—Crash Course on Scientific Ear Acupuncture for the More Advanced . 234
Level 4—Crash Course on Scientific Ear Acupuncture for the Most Advanced . 234
Clinical Courses under Supervision.... 234
Level 2—Crash Course on Scientific Body/Scalp Acupuncture for the Moderately Advanced .... 235

Level 3—Crash Course on Scientific Body/Scalp Acupuncture for the More Advanced ............... 235

Training Institutions ........................ 236
Supply Sources ............................. 237
Acupuncture Supplies ....................... 237
Point-Finders, Ear Models
Made of Rubber ......................... 237
Acupuncture Needles ..................... 237
Focus Indicator Ampoules ............. 237
Laser and TNS Equipment ............... 237

Market for Second-Hand Equipment ........................ 238

Experienced Acupuncturists .......... 239

Patient Information Leaflets .......... 240
Patient Information Leaflet:
What Is Acupuncture? ............... 240
Ear Acupuncture ...................... 241
Patient Information Leaflet:
Permanent Needles ................ 244
Patient Information Leaflet:
What Is Laser Acupuncture? ...... 245
The Importance of Focal Disturbances .... 245
Who Benefits from Laser Acupuncture? .... 246

Patient Information Leaflet:
What Is Neural Therapy? .......... 246

Index ............................................ 253
