DVD Contents .................................................................................... xi

Foreword .................................................................................. xiii

Contributors ........................................................................... xv

I Evidence-Based Medicine: Outcomes Assessment

1 Principles of Evidence-Based Medicine in Spine Trauma .......... 3
   Charles G. Fisher and Ory Keynan

2 Outcome Assessment Tools for Spinal Trauma Patients ........ 11
   F. C. Oner and C. F. M. Buckens

3 The Impact of Evidence-Based Medicine in Cervical Trauma ... 18
   Paul A. Anderson and Michael M. Vosbikian

4 The Impact of Evidence-Based Medicine in Thoracolumbar Trauma .. 21
   Joseph L. Petfield, James P. Lawrence, Jeffrey Rihn, Eric B. Harris,
   Alexander R. Vaccaro, and Christopher M. Bono

II Fundamental Principles and Clinical Assessment

5 The Changing Face of Spinal Trauma Throughout the World .... 31
   Charles G. Fisher, Jeremy Reynolds, and Vanessa K. Noonan

6 Spinal Embryology and Anatomy of the Pediatric and Adult Spine ... 39
   Michael M. Vosbikian, Joseph L. Petfield, James P. Lawrence,
   Jeffrey Rihn, Eric B. Harris, and Alexander R. Vaccaro

7 Emergency Room Evaluation of the Spinal Injury Patient Including Assessment of Spinal Shock ........................................ 51
   Bizhan Aarabi and Yasutsugu Yukawa

8 American Spinal Injury Association Neurological Examination and Neurological Assessment of Spinal Cord Injury ........ 63
   Stavropoula I. Tjoumakaris and James S. Harrop
9 Emergency Nursing and Allied Health Care of the Spine and Spinal Cord Injury Patients ................................................................. 71
Joseph Riina, Jason E. Smith, and Kathy Flint

10 Principles of Nonoperative and Intensive Care Unit Management of Spinal Cord Injury ................................................................. 78
Christian P. DiPaola and Glenn R. Rechtine II

11 Pharmacologic Management of Acute Spinal Cord Injury ................................................................. 87
R. John Hurlbert

III Imaging

12 Imaging of the Thoracic and Lumbar Spine During the Emergency Department Evaluation ... 95
Miguel A. Schmitz, Darren R. Lebl, and Mitchel B. Harris

13 Clearing the Cervical Spine in the Trauma Patient: A Systematic Review ................................. 109
John C. France

14 Spinal Nomenclature and Image Measurement Techniques for Cervical, Thoracic, Lumbar, and Sacral Injuries .............................................. 117
Jared A. Toman and Christopher M. Bono

15 Spinal Stability ........................................................................... 127
Cao Yang, Kirkham B. Wood, and Alexander R. Vaccaro

IV Problem-Based Approach to the Principles of Spinal Injury Management

16 Treatment and Outcomes of Pediatric Spinal Cord Injury ................................................................. 135
John R. Dimar and Leah Y. Carreon

17 Principles of Spinal Instrumentation in the Treatment of Pediatric Cervical, Thoracic, and Lumbar Spinal Injuries .............................................. 146
Ahmet Alanay and Z. Deniz Olgun

18 The Benefits of Early Stabilization of Spinal Fractures in the Trauma Patient ................................. 157
Miguel A. Schmitz, Darren R. Lebl, and Mitchel B. Harris

19 Principles of Cervical Whiplash Management ........................................................................... 166
Paul M. Arnold, Karen K. Anderson, and Neal G. Haynes

20 Timing of Surgical Intervention in the Setting of Acute Spinal Cord Injury .............................................. 175
Michael G. Fehlings and Marcus M. Timlin

21 Management of Spinal Cord Injury in the Setting of a Closed Head Injury .............................................. 185
Peter G. Campbell, Bizhan Aarabi, and James S. Harrop

22 Closed Skeletal Reduction and Bracing of Cervical, Thoracic, and Lumbar Spinal Injuries .............. 192
Nestor D. Tomycz, David O. Okonkwo, and Paul A. Anderson

23 Management of Cervical Spine Injuries in the Athlete: Return-to-Play Criteria .............................................. 201
Ahmad Khalidi and Russ P. Nockels

V Upper Cervical Injuries and Their Management

24 Craniofacial Disruption: Injuries of the Occiput–C1–C2 Region ......................................................... 211
Ignacio Madrazo, Carlos Zamorano, Richard J. Bransford, and Jens R. Chapman

25 Management of Type II and Type III Odontoid Fractures ................................................................. 229
Ronald W. Lindsey and Zbigniew Gugala

26 Management of C2 Traumatic Spondylolisthesis (Hangman’s Fracture) and Other Variants .............. 248
Y. Raja Rampersaud and S. Samuel Bederman
## VI Subaxial Cervical Spine Injuries and Their Management

27 The Subaxial Cervical Spine Injury Classification Scale (SLIC) .......................... 265
   Usman Zahir, Steven C. Ludwig, Andrew T. Dailey, and Alexander R. Vaccaro

28 The Cervical Spine Injury Severity Score (CSISS) ................................. 275
   Paul A. Anderson and Timothy A. Moore

29 Cervical Burst Fractures .............................................................. 280
   David G. Schwartz and Daniel J. Burval

30 Flexion and Cervical Distraction Injuries Characterized by the SLIC System ........................................ 284
   Steven C. Ludwig and Jacqueline E. Karp

31 Distraction Injuries and Ankylosing Spondylitis in Cervical Trauma ....................... 295
   Jean-Charles Le Huec, Richard Meyrat, Richard J. Bransford, Robert Morgan, and Stephane Aunoble

32 Traumatic Central Cord Syndrome Secondary to Cervical Spondylosis ...................... 319
   Jeremy Reynolds and Marcel F. Dvorak

33 Surgical Approach to Rotational/Translational Injuries Using the SLIC System ........ 327
   Brian K. Kwon and Marcel F. Dvorak

34 Management of Cervical Thoracic Junctional Injuries .................................. 337
   Christopher I. Shaffrey and Justin S. Smith

## VII Thoracolumbar Spine Injuries and Their Management

35 The Thoracolumbar Injury Classification and Severity Score (TLICS) ...................... 345
   Joseph L. Petfield, Michael M. Vosbikian, Peter G. Whang, and Alexander R. Vaccaro

36 Management of Thoracolumbar Compression Fractures .................................. 352
   Todd McCall and Andrew T. Dailey

37 Nonoperative and Surgical Management of Thoracolumbar Burst Fractures:
   A Systematic Review ........................................................................ 369
   Lali H. S. Sekhon

38 Thoracolumbar Flexion-Distraction Injuries .................................................. 383
   Stephen P. Kingwell and Charles G. Fisher

39 Thoracolumbar Hyperextension Injuries in the Stiff Spine .................................. 391
   Rune Hedlund and Jorrit-Jan Verlaan

40 Thoracolumbar Injury Classification for Fracture-Dislocations .......................... 400
   Justin S. Smith and Christopher I. Shaffrey

41 Confounders and Their Influence on the Thoracolumbar Injury Classification
   and Severity Score (TLICS) .......................................................... 411
   Allister R. Williams and Jonathan N. Grauer

42 Surgical Management of Osteoporotic Thoracolumbar Spinal Fractures ............... 414
   Oliver I. Schmidt, Yohan Robinson, Ralf H. Gahr, and Marcel F. Dvorak

43 Surgical Management of Posttraumatic Kyphosis .......................................... 427
   Cao Yang and Kirkham B. Wood

44 The Role of Surgery in Traumatic Conus Medullaris and Cauda Equina Injuries .... 433
   Ory Keynan and Marcel F. Dvorak

45 Sacral Fractures .................................................................................. 441
   Jens R. Chapman, Carlo Bellabarba, Thomas A. Schildhauer, Rick C. Sasso,
   and Alexander R. Vaccaro
VIII  Rehabilitation Following Spinal Injury and Late Complications

46  Autonomic Dysreflexia ................................................................. 453
Carlos Villanueva, M. A. González-Viejo, and Ampar Cuxart

47  Management of Neuropathic Pain and Late Syrinx Formation ........ 465
Nicholas Theodore, James S. Harrop, and Peter H. Maughan

48  Rehabilitation Strategies for Spinal Cord Injury–Induced Neuropathic Pain and Spasticity ...... 471
Alpesh A. Patel

49  Charcot Disease of the Spine after Traumatic Spinal Cord Injury .................. 485
Amit O. Agarwala

IX  Emerging Techniques and Translational Research

50  Anterior Endoscopic Treatment of Thoracolumbar Spine Fractures .................. 493
Eli M. Baron, Mark B. Dekutoski, and Neel Anand

51  Vertebroplasty Techniques for Stabilization of Thoracolumbar Spine Traumatic Fractures ...... 500
F. C. Oner and Jorrit-Jan Verlaan

52  Minimally Invasive Posterior Stabilization Techniques in Trauma .................. 505
Neel Anand, Eli M. Baron, and Mark B. Dekutoski

53  Promising Preclinical Regeneration and Repair Strategies for Spinal Cord Injury ........ 516
James W. Rowland, Gregory W. J. Hawryluk, Brian K. Kwon, and Michael G. Fehlings

54  Emerging Rehabilitation Strategies for Spinal Cord Injury .......................... 527
Andrew J. Tsung and Daniel R. Fassett

55  Robotics, Functional Electrical Stimulation, Brain–Computer Interfaces, and Locomotor Training Strategies ......................................................... 534
David M. Benglis Jr. and Allan D. Levi

56  Translational Clinical Research in Acute Spinal Cord Injury ......................... 539
Gregory W. J. Hawryluk, Brian K. Kwon, and Michael G. Fehlings

Index ............................................................................................................. 553
1 Closed Skeletal Traction Technique for Cervical Facet Dislocation  
   Joseph L. Petfield, Adam Shimer, and Alexander R. Vaccaro

2 Posterior C1–2 Fixation  
   Michael G. Fehlings

3 Type II Odontoid Fracture with Associated Subaxial Distraction Extension Injury, Managed with  
   Anterior Odontoid Screw and Anterior Cervical Decompression and Fusion  
   Joseph L. Petfield and Alexander R. Vaccaro

4 Open Anterior and Posterior Cervical Reduction Maneuver for Cervical Dislocation  
   Todd Rubin, Joseph L. Petfield, James Zaslavksy, and Alexander R. Vaccaro

5 Minimally Invasive Posterior Fixation of Lumbar Flexion-Distraction Injury  
   Kees Poelstra and Steven C. Ludwig

6 The Balloon Assisted Endplate Reduction Techniques (BAER) for Thoracolumbar Fractures  
   F. Cumhur Oner

7 Minimally Invasive Lumbar Decompression and Fusion for Flexion-Distraction Injury  
   Y. Raja Rampersaud and Michael M. Vosbikian

8 Minimally Invasive Posterior Lumbar Fixation Following Anterior Column Reconstruction  
   Eli M. Baron

9 Lumbosacral Fracture Decompression and Fixation  
   Harvey E. Smith, Joseph L. Petfield, and Alexander R. Vaccaro

10 Posterior Open Reduction Technique for Thoracolumbar Distraction Extension Injury  
    Joseph L. Petfield, Harvey E. Smith, and Alexander R. Vaccaro

11 Open Reduction Internal Fixation for Thoracic Fracture-Dislocation  
    Michael Vosbikian and Alexander R. Vaccaro

12 Open Posterior Thoracic Decompression and Reduction for Thoracic Burst Fracture  
    Tierney Holmes, Joseph L. Petfield, and Alexander R. Vaccaro

13 Anterior Thoracolumbar Corpectomy and Reconstructive Techniques for a Thoracolumbar  
    Burst Fracture  
    Harvey E. Smith and Alexander R. Vaccaro
