Disclaimer

Some of the product names, patents, and registered
designs referred to in this publication are in fact
registered trade marks or proprietary names even
though specific reference to this fact is not always
made in the text. Therefore, the appearance of a
name without designation as proprietary is not to be
construed as a representation by the Publisher that
it is in the public domain.

Important Note

Medical knowledge is ever-changing. As new research
and clinical experience broaden our knowledge,
changes in treatment and drug therapy may be
required. The authors and editors of the material
herein have consulted sources believed to be reliable
in their efforts to provide information that is complete
and in accord with the standards accepted at the time
of publication. However, in view of the possibility of
human error by the authors, editors, or publisher of
the work herein, or changes in medical knowledge,
neither the authors, editors, or publisher, nor any
other party who has been involved in the preparation
of this work, warrants that the information contained
herein is in every respect accurate or complete, and
they are not responsible for any errors or omissions or
for the results obtained from use of such information.
Because of rapid advances in the medical sciences,
independent verification of diagnoses and drug
dosages should be made. Readers are encouraged to
confirm the information contained herein with other
sources. For example, readers are advised to check
the product information sheet included in the pack-
age of each drug they plan to administer to be certain
that the information contained in this publication is
accurate and that changes have not been made in the
recommended dose or in the contraindications for
administration. This recommendation is of particular
importance in connection with new or infrequently
used drugs.

Although all advertising material is expected to
conform to ethical (medical) standards, inclusion
in this journal does not constitute a guarantee or
endorsement of the quality or value of such product
or of claims made by its manufacturer.
