**Time and Life Management for Medical Students and Residents**
Michael Sabel
2017/76 pp./softcover/
ISBN 978-3-13-241279-8/

...probably the most valuable resource you will need as you enter and begin your medical residency. This handy guide is small enough to fit into your coat pocket and become your trusted companion as you go through your daily rounds visiting your patients. -- BIZ INDIA

As grueling as medical studies and training are, with appropriate discipline and time management it's possible to stay afloat, maintain sanity, achieve goals, and still enjoy a fulfilling life. This book stimulates the thought processes that nurture a healthy attitude toward organizing time so as to improve one's own quality of life and the patient's well-being.

**Essays in Medical Ethics**
Plea for a Medicine of Prudence
Giovanni Maio
2017/224 pp./hardcover/

Find your way to a new serenity as a condition for a good life

Professor Giovanni Maio, the eloquent advocate of a new culture of medicine, poses fundamental questions in this book that no one can really avoid: Where are the promises of reproductive and transplantation medicine leading us? To what extent can health be made, and to what extent is it a gift? Does "prettier, better, stronger" promise us greater happiness? Why is the question of organ donation more difficult than is suggested to us? Does being old have its own intrinsic value? How can we acquire an attitude towards dying that does not leave us feeling powerless?

**How NOT to Write a Medical Paper**
A Practical Guide
Markus Heinemann
2016/104 pp./softcover/

Don't do that!
Discover the common mistakes in writing medical papers.

Writing a medical paper, or any other scientific publication, is full of pitfalls which may make it difficult to get a manuscript accepted for publication. How NOT to Write a Medical Paper gives very practical advice on how to avoid these and is richly "illustrated" with predominantly negative examples. This short yet comprehensive and very easy-to-read guide is of value to anyone with an interest in scientific publishing.
