DESCRIPTION
Reconstructive Plastic Surgery of the Head and Neck describes the current state-of-the-art techniques used in head and neck reconstruction. Residents, fellows and attendings can follow the up-to-date, step-by-step instructions and images in this book to perform reconstructive surgical techniques for head and neck cancer patients. The cutting-edge descriptions of computer modeling, robotic surgery, and composite tissue allotransplantation lay the foundation for continued innovation.

SALES HOOKS
- Algorithms for each head and neck sub-region to guide clinical decision-making
- Step-by-step technical descriptions of the most commonly used flaps in head and neck reconstruction
- “Pearls and Pitfalls” sections outline key concepts and critical nuances in surgical technique or patient management

COMPETITION

Urken: Multidisciplinary Head and Neck Reconstruction: A Defect-Oriented Approach, © 2009, 848 pp, $457.99, LWW. Not a bad book, but the price has always been outrageous. The same author has a flaps book, which is also outrageously priced.

CONTENTS
Section I. Reconstruction of Head and Neck Defects
Section II. Flap Atlas
