

TITLE	Science of Synthesis: Dual Catalysis in Organic Synthesis 2 1st Edition
PRICE	€2999.99
ISBN	9783132429819
PUBLICATION DATE	December 2019
FORMAT	Hardcover · 0 Illustrations · 500 Pages · 6.75 X 10 IN
SPECIALTY	Chemistry
LEVEL	All chemists in industry and academia involved in synthetic organic chemistry

EDITORS **Gary A. Molander**

DESCRIPTION The field of dual catalysis has developed rapidly over the last decade, and these volumes define its impact on organic synthesis. The most important, basic concepts of synergistic, dual catalytic cycles are introduced, providing newcomers to the field with reliable information on this new approach to facilitating the synthesis of organic molecules. Background information and reliable procedures for challenging transformations in synthesis are presented, applying the concept of cooperative dual catalysis as a means of increasing molecular complexity in the most efficient manner. The most useful, practical, and reliable methods for dual catalysis combining metal catalysts, organocatalysts, photocatalysts, and biocatalysts are presented.
