## DESCRIPTION

***Learn to identify histological structures and their correlated functions!***

*Histology: An Essential Textbook* is a concise, multimedia study guide for medical students who need to learn the functions and related correlations of cells, tissues, and organs of the human body. Professor D.J. Lowrie, Jr. has written a unique and practical medical histology resource based on self-directed modules originally created to replace live histology laboratory sessions. This resource will help medical students learn how to identify histological structures on slide preparations and electron micrographs. Short videos by the author, who demonstrates structures via digitized histology slides, provide additional guidance.

Shorter, targeted concepts and brief explanations accompanied by numerous illustrations, self-assessment quizzes, and videos demonstrating key features of histological structures set this resource apart from existing, text-dense books.

### Key Features

- Approximately 600 images, consisting primarily of electron and light micrographs, aid in identification of histological structures and long-term retention
- Correlation of histological structure with other basic science disciplines, such as gross anatomy, embryology, and pathology allows students to integrate material effectively
- About 350 online multiple choice questions and answers mirror exam topics students frequently encounter in curriculum and the USMLE®
- Nearly 375 videos provide a personal tutor that teaches students histological structures, while providing tips for proper identification

This is a must-have self-study guide for medical students, as well as a stellar teaching tool for instructors.

This book includes complimentary access to a digital copy on <https://medone.thieme.com>.

1. Introduction to Microscopy and the Cell
2. Nucleus

3. Cytoplasm
  4. Epithelial Classification
  5. Epithelial Specializations
  6. Epithelia – Glands
  7. Connective Tissue Overview
  8. Generic Connective Tissues
  9. Adipose Tissue
  10. Cartilage
  11. Bone Histology
  12. Bone Development
  13. Skeletal Muscle
  14. Cardiac and Smooth Muscle
  15. Neural Tissue
  16. Cardiovascular Overview
  17. Blood
  18. Hematopoiesis Overview
  19. Hematopoiesis – White Blood Cells and Platelets
  20. Hematopoiesis – Red Blood Cells
  21. Bone Marrow and Thymus
  22. Diffuse Lymphoid Tissue
  23. Lymph Nodes
  24. Spleen
  25. Vasculature
  26. Heart
  27. Integument
  28. Gastrointestinal Overview
  29. Intestines
  30. Oral Cavity
  31. Pharynx, Esophagus, and Stomach
  32. Pancreas
  33. Liver and Gall Bladder
  34. Kidney Overview
  35. Kidney – Renal Tubules
  36. Kidney – Renal Corpuscle
  37. Extrarenal Passages
  38. Upper Respiratory System
  39. Lungs
  40. Pituitary Gland
  41. Adrenal Gland
  42. Thyroid and Parathyroid glands
  43. Testis and Genital Ducts
  44. Male Accessory Structures
  45. Ovary
  46. Oviduct, Uterus, and Vagina
