TITLE	Stuttering and Related Disorders of Fluency 4th Edition
PRICE	€84.99
ISBN	9781684202539 (Previous Edition: 9781588905024, 2007)
PUBLICATION DATE	June 2022
FORMAT	Hardcover · 78 Illustrations · 312 Pages · 8.5 X 11 IN
MEDIA CONTENT	Complimentary MedOne eBook and Videos
SPECIALTY	Speech-Language Pathology
LEVEL	Graduate students in speech language pathology programs taking a stuttering/fluency disorders course

EDITORS

Patricia M. Zebrowski, PhD, CCC-SLP, is Professor Emerita, Department of Communication Sciences and Disorders, University of Iowa, Iowa City, Iowa, USA.

Julie D. Anderson, PhD, CCC-SLP, is an Associate Professor, Department of Speech, Language and Hearing Sciences, Indiana University, Bloomington, Indiana, USA.

Edward G. Conture, PhD, CCC-SLP, is Professor Emeritus, Department of Hearing and Speech Sciences, Vanderbilt University, Nashville, Tennessee, USA.

DESCRIPTION

A student-friendly resource on stuttering and related fluency disorders by a who's who of global experts

Stuttering and Related Disorders of Fluency, Fourth Edition honors the philosophy that discoveries of the past are the bedrock of the present and the inspiration for future explorations—in this context—the nature and treatment of stuttering. Initially developed over 30 years ago, the first two editions were edited by the late Richard F. Curlee and the third edition was co-edited by Richard F. Curlee and Edward G. Conture. The latest edition, co-edited by Patricia M. Zebrowski, Julie D. Anderson, and Edward G. Conture, brings together contemporary insights and a multinational perspective from 44 world-class academicians, clinicians, and researchers in the field of stuttering and related disorders.

The book is organized into six sections and 17 chapters, with the first section describing basic facts and theories. The second section covers genetic, neural, linguistic, cognitive, and physiological factors. The third section features three dedicated chapters on the diagnosis of preschool-age children, school-age children, and adolescents and adults. The fourth section discusses treatment guidelines with three chapters organized by the same age demographics, while the fifth section covers language and phonological, bilingual and multicultural, and pharmacological considerations for treatment. The sixth, and last, section provides guidance on cluttering and acquired stuttering—from causes and symptoms to diagnosis and treatment.

Key Highlights

- Up-to-date, reader-friendly text is ideal for students with no or limited background or experience in the nature and treatment of stuttering and related fluency disorders
- Comprehensive content covering all relevant aspects of stuttering in diverse populations across the lifespan, including etiology, development, diagnosis, and treatment
- Contributions from a diverse group of top scholars and practitioners from the United States, Canada, Western Europe, and Australia

This text is essential reading for upper-class undergraduates and early-stage graduate students in communication sciences and disorders. It also provides an invaluable classroom tool for instructors

teaching basic courses on this subject and is a helpful sourcebook for researchers investigating stuttering and related fluency disorders.

This print book includes complimentary access to a digital copy on <https://medone.thieme.com>.

COMPETITION Guitar, *Stuttering: An Integrated Approach its Nature and Treatment*, 5th ed., 376 pages, LWW, 2019, \$109.99.
Seery, *Stuttering: Foundations and Clinical Applications*, 2nd ed., 552 pages, Pearson, 2014, \$186.65.

CONTENTS

- Section I: Some Characteristics and Theories**
 - 1 Common Characteristics
 - 2 Some 20th- and 21st-Century Theories of Stuttering: A Brief Overview
- Section II: Processes Associated with Stuttering**
 - 3 Genetic Processes
 - 4 Speech, Language, and Cognitive Processes
 - 5 Neural and Physiological Processes
 - 6 Temperamental and Emotional Processes
- Section III: Diagnosis of Stuttering**
 - 7 Preschool-Age Children
 - 8 School-Age Children
 - 9 Adolescents and Adults
- Section IV: Treatment of Stuttering**
 - 10 Preschool-Age Children
 - 11 School-Age Children
 - 12 Adolescents and Adults
- Section V: Additional Treatment Considerations**
 - 13 Language and Phonological Considerations
 - 14 Bilingual and Multicultural Considerations
 - 15 Pharmacological Considerations
- Section VI: Related Fluency Disorders**
 - 16 Cluttering: Etiology, Symptomatology, Identification, and Treatment
 - 17 Acquired Stuttering: Etiology, Symptomatology, Identification, and Treatment

TITLE	Hair Transplantation 6th Edition
PRICE	€249.99
ISBN	9781626236936 (Previous Edition: 9781626235700, 2010)
PUBLICATION DATE	September 2022
FORMAT	Hardcover · 1007 Illustrations · 704 Pages · 8.5 X 11 IN
MEDIA CONTENT	Complimentary MedOne eBook and Videos
SPECIALTY	Plastic surgery; Dermatology
LEVEL	Hair restoration surgeons, Dermatologists, Plastic Surgeons

EDITORS

Robin Unger, MD, FISHR, is Assistant Professor, Department of Dermatology, Icahn School of Medicine at Mount Sinai, Mount Sinai Hospital, New York, New York, USA.

Ronald Shapiro, MD, FISHR, is Medical Director, Shapiro Medical Group, and Clinical Instructor, Department of Dermatology, University of Minnesota Medical School, Minneapolis, Minnesota, USA.

DESCRIPTION

The definitive resource on leading-edge hair transplantation techniques from global experts!

This sixth edition of *Hair Transplantation*, edited by renowned surgeons Robin Unger and Ronald Shapiro and with contributions from innovators worldwide, builds on its longstanding reputation as the one trusted, unbiased, and acclaimed educational resource for state-of-the-art hair restoration techniques. Comprehensively updated with all the latest advances, the sixth edition includes full discussion of the pros and cons of various surgical and nonsurgical approaches, controversies, and evidence-based clinical pearls gleaned through hands-on expertise. It also covers important practice management topics such as proper training, instrumentation, and medico-legal issues.

A new section featuring 26 chapters dedicated to follicular unit extraction (FUE) covers the considerable improvements realized since the previous edition, including options for multiphasic automation, improved punch designs, and advanced instrumentation. Other additions to the text detail the expanded use of sharp and dull implanters for atraumatic hair graft placement, scalp micro-pigmentation (SMP), improved holding solutions, emerging cell and regenerative therapies, and much more.

Key Features

- Now in full color, more than 1,000 images enhance knowledge and enrich the educational experience
- Coverage of modern punch technology; improved methods of donor area evaluation and hair graft survival; innovative body, beard, non-shaven, and long hair FUE procedures; and other cutting-edge topics
- Updated information on hairline design techniques, transgender patients, cosmetic and reconstructive eyelash transplants, eyebrow transplants, and ethnic variations
- 31 accompanying surgical videos instruct the reader in all aspects of hair transplantation surgery

This is the must-have reference for hair restoration surgeons, dermatologists, plastic surgeons, facial plastic surgeons, and trainees in these fields, and is essential reading for physicians prepping for board exams.

This book includes complimentary access to a digital copy on <https://medone.thieme.com>.

COMPETITION There is no competition that covers the topic in as much depth and breadth as this text.

CONTENTS

Section I. Basic Science

- Chapter 1: The History and Evolution of Hair Transplantation
- Chapter 2: Scalp Anatomy
- Chapter 3: Hair Anatomy and Histology for the Hair Transplant Surgeon
- Chapter 4: Hair Follicle Physiology and Mechanisms of Hair Disorders
- Chapter 5: Review of Studies on Graft Hair Survival
- Chapter 6: Methods and Techniques to Study Hair Cell Survival

Section II. Etiologies and Non-Surgical Treatment of Hair Loss

- Chapter 7: Pathogenesis and Classification of Male Pattern Hair Loss (Androgenic Alopecia)
- Chapter 8: Pathogenesis and Classification of Female Pattern Hair Loss
- Chapter 9: Non-Androgenic Hair Loss
- Chapter 10: Medical Treatment of Male and Female Pattern Hair Loss
- Chapter 11: Plasma Rich Protein (PRP) and Acell
- Chapter 12: Hair Transplantation: The Promise of Cell Therapy
- Chapter 13a: "Permanent" Scalp Micropigmentation
- Chapter 13b: "Temporary" Scalp Micropigmentation (Tricopigmentation)
- Chapter 14: Cosmetic Cover-Ups and Hair Pieces
- Chapter 15: OTC Preparations

Section III. Evaluation and Planning

- Chapter 16: The Consultation and Surgical Planning
- Chapter 17: Dermoscopy and Scalp Biopsy in the Hair Transplant Evaluation
- Chapter 18: Digital Imaging and Other Ancillary Tools for the Hair Transplantation Evaluation
- Chapter 19: Special Considerations in the Evaluation of Females with Hair Loss
- Chapter 20: Planning Principles: Good Short- and Long-Term Planning in Hair Transplantation
- Chapter 21: FUT or FUE: Planning and Decision-Making
- Chapter 22: The Young Patient: Planning and Decision-Making
- Chapter 23: The Patient With Minimal Hair Loss: Planning and Decision Making
- Chapter 24: The Patient With Severe Hair Loss: Planning and Decision Making
- Chapter 25: The Vertex: Planning and Decision Making
- Chapter 26: Planning in Female Hair Transplant Surgery
- Chapter 27: Preoperative Preparation and Instruction
- Chapter 28: OSHA, Laboratory Screening and Office-Based Surgery (OBS)
- Chapter 29: Practical Guide to Photographic Documentation

Section IV. Strip Harvesting Procedure

- Chapter 30: An Overview of Anesthetic Modalities Used In Hair Restoration Surgery
 - Chapter 31: Anesthesia Techniques Used for Donor and Recipient Areas
 - Chapter 32: Nerve Blocks
 - Chapter 33: Emergency Preparedness in Hair Restoration Surgery
 - Chapter 34: Preoperative Donor Evaluations
 - Chapter 35: Strip Excision Techniques
 - Chapter 36: Closure Techniques
 - Chapter 37: Graft Production
 - Chapter 38: Holding Solutions
 - Chapter 39: Overview of Recipient Site Creation
 - Chapter 40: Hairline Design and Frontal Hairline Restoration
 - Chapter 41: Recreating the Temporal Points
 - Chapter 42: Recreating the Vertex
 - Chapter 43: Large Grafting Session
 - Chapter 44: High-Density Transplants
 - Chapter 45: Placing Into Premade Incisions with Forceps
 - Chapter 46: Stick and Place Technique
 - Chapter 47a: Graft Placing Using Implanter Devices
 - Chapter 47b: The "Keep": A FUE Placing Instrument That Protects Grafts Integrity and Increases Hair
-

Survival

Chapter 48: Staining and Other Adjunctive Methods to Assist with Placing

Chapter 49: Postoperative Care and Instructions

Chapter 50: Donor Area Complications – Strip Harvest

Chapter 51: Complications of the Recipient Area

Section V. Follicular Unit Extraction Procedure

Chapter 52a: Introduction and Definition of FUE

Chapter 52b: FUE Terminology

Chapter 53: The Advantages and Disadvantages of FUE

Chapter 54: Punch Designs

Chapter 55a: Evaluation, Planning and Donor Concerns with FUE

Chapter 55b: The Coverage Value Calculation: An Objective Method of Evaluating Donor Supply and Coverage

Chapter 56: Maximizing Graft Survival in FUE: Incision and Extradition Phase

Chapter 57: Maximizing Graft Survival in FUE: The Implantation Phase

Chapter 58: Special Considerations for Anesthesia with FUE

Chapter 59: Special Considerations for Postoperative Care in FUE

Chapter 60: Quality Control and Quality Assurance During the FUE Process

Chapter 61: Ergonomics in Hair Restoration Surgery: FUE Technique

Chapter 62: Manual FUE Technique

Chapter 63: Motorized Sharp Punch FUE

Chapter 64: Motorized Blunt Punch FUE

Chapter 65: Suction-Assisted FUE

Chapter 66: Automated/Robotic FUE

Chapter 67: Newer Systems and Methods for FUE

Chapter 68: FUE to Harvest Beard

Chapter 69: FUE to Harvest Body Hair

Chapter 70: FUE in Black Patients

Chapter 71: FUE for Corrective Work

Chapter 72a: Non-Shaven FUE Techniques

Chapter 72b: Long Hair Preview FUE Techniques

Chapter 73: FUE Complications

Chapter 74: Combining Strip and FUE in the Same Patient and /or Procedure

Section VI. Repair and Special Considerations

Chapter 75: Transgender Patients

Chapter 76: Transplanting into Areas of Cicatricial Alopecia

Chapter 77: Transplanting into the Pubic Area

Chapter 78: Hair Transplantation to the Chest

Chapter 79: Cosmetic and Reconstructive Eyelash Transplantation

Chapter 80: Eyebrow Transplantation

Chapter 81: Beard Transplant

Chapter 82: Preview Long Hair Transplantation

Chapter 83: Combination Grafting

Chapter 84: Hairline and Recipient Area Repair of Poor Previous Transplantation

Chapter 85: Donor Scar Repair

Chapter 86: Hairline Lowering Technique

Chapter 87: Scalp Extension and Triple-Flap to Treat Extensive Baldness

Chapter 88: Scalp Repair Using Flaps and Tissue Expanders

Section VII. Special Ethnic Considerations

Chapter 89: East, West and Southern Asian Hair Transplant Specifics

Chapter 89a: Hair Transplantation in East and South East Asian Patients (ESEA)

Chapter 89b: Hair Transplantation in South Asian Hair

Chapter 89c: West Asian Hair Characteristics

Chapter 90: Hair Transplantation in Black Patients

Chapter 91: Hair Loss and Hair Restoration in Latin Americans

Section VIII. Office and Practice Considerations: The Clinical and Commercial Perspective

Chapter 92: Physician Training and Experience

Chapter 93: Setting Up an Office and the Surgical Suite

Chapter 94: Instrumentation and Supplies Used in Hair Restoration Surgery

Chapter 95: Medico-Legal Issues in Hair Replacement

Chapter 96: Setting Up Your Office and Practice: Exclusively Hair Transplants vs. Combined Practice

Chapter 97: Contact Management Software and Its Utilization as a Marketing Tool

Chapter 98: Online Marketing

Chapter 99: The Power of PR in an Aesthetic Medical Practice: PR Revealed

Chapter 100: Plugged In: How To Ensure That Your Practice Thrives (and Survives) in Today's Digital World

Chapter 101: Finding and Training Assistants

Chapter 102: Surgical Assistants: Per Diem or Full Time Staff

EDITORS

Christopher B. Harmon, MD, FAAD, FACMS, is a Dermatologic Surgeon, Surgical Dermatology Group, and Director of the ACGME Fellowship in Micrographic Surgery and Dermatologic Oncology, Birmingham, Alabama, USA.

Stanislav N. Tolkachjov, MD, FAAD, FACMS, is a Dermatologic Surgeon and the Dallas-Fort Worth Area Director of Mohs Micrographic & Reconstructive Surgery at Epiphany Dermatology; Clinical Assistant Professor at University of Texas, Southwestern and VA Medical Center, Dallas, Texas, USA.

DESCRIPTION

A systematic approach to Mohs surgery and reconstruction from renowned skin cancer surgeons

More than 5.4 million cases of nonmelanoma skin cancer, most notably basal cell, squamous cell carcinoma, and melanoma, occur annually in the United States alone. The Mohs technique, developed in the 1950s and refined over the years, has the highest cure rate of any treatment for nonmelanoma skin cancer, is used increasingly for melanoma, and the lowest recurrence rate. *Mohs Micrographic Surgery: From Layers to Reconstruction* by renowned dermatologic and Mohs surgeons Christopher Harmon and Stanislav Tolkachjov provides a detailed yet succinct road map to learning and mastering Mohs and reconstruction.

The algorithmic organization coupled with instructive photographs and illustrations provide a reader-friendly format conducive to learning. The two opening chapters describe the principles of Mohs surgery including: progressive layer excision to determine if wound margins are cancer free, associated pitfalls, recurrences, special sites, reconstructive principles, and general considerations. The subsequent eight chapters are organized by facial site, from the nose to the eyelid/eyebrow. The final two chapters discuss combination reconstructions stretching over multiple subunits and perioperative management and wound care.

Key Highlights

- An impressive group of global Mohs and reconstruction experts provide firsthand pearls that guide optimal treatment
- Relevant anatomical aspects that impact excision and reconstruction are detailed, including structures, skin tension lines, tissue planes, and dangers zones
- More than 20 procedural videos provide hands-on guidance on how to perform specific steps in Mohs and reconstruction

This unique resource will help residents, fellows, and surgeons in dermatology, plastic surgery, and facial plastic surgery master nuances of Mohs reconstructive techniques to achieve the most functional and aesthetically pleasing outcomes for patients.

SPECIALTY	Radiology
LEVEL	Radiologists

EDITORS **Michael Iv, MD**, is Clinical Associate Professor of Radiology (Neuroradiology), Stanford University Medical Center, Stanford, California, USA.

DESCRIPTION *The quintessential case-based review to prep for and master ABR exams*

The American Board of Radiology Core, Certifying, and Neuroradiology Subspecialty Exams test an individual's knowledge and understanding of anatomy, pathophysiology, and physics concepts important in diagnostic imaging. For many residents, fellows, and practicing radiologists, preparation for these exams involves several months to years of reading text, interpreting images, and answering countless questions. *Neuroradiology Q&A for the Radiology Boards*, edited by neuroradiologist Michael Iv, features contributions from other academic neuroradiologists at Stanford University who are passionate about education and paying it forward. The primary goals of this book are to help current and future generations of radiologists ace the neuroradiology section of these exams and improve their clinical skills.

The reader-friendly compilation of cases, questions, and answers reflects the invaluable insights of neuroradiologists who recently experienced the arduous journey of studying and sitting for the ABR exams. The book consists of a collection of 100 "standard difficulty" and "challenging" cases organized by the categories of brain, spine, and head and neck. A total 70 cases covering a wide range of brain conditions and diseases include 20 challenging cases. Spine and head and neck pathologies are represented by 15 cases each, both of which include 5 challenging cases. All of the cases illustrate specific pathologies and teaching points likely to be encountered on the exams and in the reading room.

Key Features

- Cases encompass every area of neuroradiology and cover the full age spectrum
- Consistently formatted cases feature two or three high-yield images, followed by three multiple choice questions that assess comprehension of imaging diagnosis, histopathology, and management
- Detailed explanations for correct and incorrect answers enhance understanding and acquisition of knowledge

This must-have study guide will help radiologists prepare for and ace the Core, Certifying, and/or Neuroradiology Subspecialty ABR exams and improve their clinical knowledge, which ultimately leads to improved patient care.

This print book includes complimentary access to a digital copy on <https://medone.thieme.com>.

COMPETITION

- *Board Vitals in Radiology*. 1750 online multiple choice questions with detailed answers. Subscription options: 6 months for \$399; 2 months for \$229; 1 month for \$139.

- *RadPrimer Questions*. RadPrimer is the review program associated with Stat dx. It has over 6000 questions covering basics and more advanced questions.
- *Titan Radiology*. Fairly new site based on popular book series, *Crack the Core Exam*. Offers the *Crack the Core* series books, video lectures, case review, and 750 Q&A. Subscription options: 12 months for \$948; 6 months for \$596; 3 months for \$417.
- *The Lippincott Core Review* series (print books). A series of radiology subspecialty books—each about 300 pages, covering the major radiology subspecialties. Each book contains 300 questions and is selling for \$69.99.
- *The Case Review Series* (Elsevier, print books). An established series that has been a case review competitor to RadCase, but with added multiple-choice Q&A component in recent editions. Most are \$69.99; some smaller volumes as low as \$59.99.

CONTENTS**100 TOTAL CASES (number and type of cases):**

70 brain (including 20 challenge)

15 spine (including 5 challenge)

15 head and neck (including 5 challenge)

BRAIN

Case: Acute disseminated encephalomyelitis (ADEM)

Case: Coccidioidal brain abscess

Case: Creutzfeldt-Jakob Disease (CJD)

Case: Neurosarcoidosis

Case: Intracranial hypotension

Case: Primary CNS melanoma

Case: Hemorrhagic venous infarct

Case: Cerebral amyloid angiopathy

Case: Pituitary apoplexy

Case: Progressive multifocal leukoencephalopathy (PML)

Case: Rathke cleft cyst

Case: Invasive pituitary adenoma

Case: CADASIL

Case: Subacute infarct

Case: HSV encephalitis

Case: CNS toxoplasmosis

Case: Posterior Reversible Encephalopathy Syndrome (PRES)

Case: Methotrexate leukoencephalopathy

Case: Diffuse axonal injury (DAI)

Case: Multiple system atrophy – cerebellar variant (MSA-c)

Case: Indirect carotid cavernous fistula

Case: Ruptured aneurysm of the anterior communicating artery

Case: Basilar artery thrombosis

Case: MELAS

Case: Focal cortical dysplasia

Case: Tuberculous meningoencephalitis

Case: HIV encephalopathy

Case: Glioblastoma (GBM)

Case: Primary CNS lymphoma

Case: Subependymoma

Case: Dysembryoplastic neuroepithelial tumor (DNET)

Case: Subependymal giant cell astrocytoma (SEGA)

Case: Neurofibromatosis type II

Case: Capillary telangiectasia

Case: Orbital venolymphatic malformation

Case: Cavernous sinus thrombosis

Case: Bell's palsy

Case: Pontine perforator infarct

Case: Mesial temporal sclerosis
Case: Central neurocytoma
Case: Neurocysticercosis
Case: Trigeminal neuralgia with neurovascular compression
Case: Venous epidural hematoma
Case: Remote cerebellar hemorrhage
Case: Colloid cyst
Case: Diffuse midline glioma
Case: Xanthogranuloma of the choroid plexus
Case: Fahr Disease
Case: Ruptured dermoid
Case: Gliomatosis cerebri
Case (Challenge): CLIPPERS
Case (Challenge): Susac syndrome
Case (Challenge): HHV-6 encephalitis
Case (Challenge): Transient global amnesia (TGA)
Case (Challenge): Multinodular and vacuolating neuronal tumor (MVNT)
Case (Challenge): Artery of Percheron infarct
Case (Challenge): Hypoglycemic brain injury
Case (Challenge): Fragile-X-Associated Tremor Ataxia Syndrome
Case (Challenge): Status epilepticus
Case (Challenge): Amyotrophic Lateral Sclerosis
Case (Challenge): Intravascular lymphoma
Case (Challenge): Corpus callosal signal change associated with hydrocephalus after shunting
Case (Challenge): Granulomatosis w/ polyangiitis (GPA)
Case (Challenge): Pituitary hyperplasia
Case (Challenge): "White" epidermoid
Case (Challenge): Endolymphatic sac tumor
Case (Challenge): Hypertrophic olivary degeneration
Case (Challenge): Nonketotic hyperglycemia
Case (Challenge): Pineal parenchymal tumor of intermediate differentiation (PPTID)
Case (Challenge): Anterior temporal lobe perivascular space

SPINE

Case: Traumatic cord contusion
Case: Neuromyelitis optica spectrum disorder (NMOSD)
Case: Cord cavernous malformation
Case: Leptomeningeal carcinomatosis
Case: Tuberculous spondylitis
Case: Spinal anaplastic astrocytoma
Case: Chiari I malformation
Case: Intradural disc extrusion
Case: Spinal cord hemangioblastoma
Case: Diastematomyelia
Case (Challenge): Cervical spondylotic myelopathy
Case (Challenge): Spinal cord wallerian degeneration
Case (Challenge): Spinal intradural hematoma
Case (Challenge): Traumatic neuroma and pseudomeningocele
Case (Challenge): Hirayama disease

HEAD AND NECK

Case: Jugular foramen paraganglioma (glomus jugulare)
Case: Acute invasive fungal sinusitis
Case: Pars flaccida cholesteatoma
Case: Otosclerosis, displaced prosthesis
Case: Facial nerve schwannoma
Case: Fibrous dysplasia

Case: Cholesterol granuloma
Case: Ramsay Hunt syndrome
Case: Inverted papilloma
Case: Arrested pneumatization of the sphenoid sinus
Case (Challenge): Persistent craniopharyngeal canal
Case (Challenge): Giant cell tumor
Case (Challenge): Bisphosphonate osteonecrosis
Case (Challenge): Ectopic lingual thyroid
Case (Challenge): Petrous apex chondrosarcoma

Humaira Chaudhry, MD, is Chair (Interim) and Associate Professor, Department of Radiology, Rutgers New Jersey Medical School, Newark, New Jersey, USA.

Li-Hsiang Yen, MD, is Assistant Professor of Clinical Imaging Sciences, Department of Imaging Sciences, University of Rochester Medical Center, Rochester, New York, USA.

Abdul-Kareem Beidas, MD, MBA, is a Fellow, Division of Breast Imaging, Department of Diagnostic Radiology, Brown University, The Warren Alpert Medical School, Providence, Rhode Island, USA.

John C. Sabatino, MD, is Assistant Professor, Department of Radiology, Rutgers New Jersey Medical School, Newark, New Jersey, USA.

DESCRIPTION

The quintessential study prep for the gastrointestinal section on the ABR core exam

Preparing for the American Board of Radiology core exam can be stressful and at times overwhelming, given the magnitude of current review material. The gastrointestinal imaging section is especially challenging because the examinee must be well acquainted with the aging modality of fluoroscopy, as well as much newer body MRI techniques. *Gastrointestinal Imaging Q&A for the Radiology Boards* by renowned educator and radiologist Humaira Chaudhry and esteemed colleagues Li-Hsiang Yen, Abdul-Kareem Beidas, and John C. Sabatino, presents 100 high-yield GI cases. The cases are organized in six sections: the liver, biliary system, pancreas, spleen, GI tract, and peritoneum that cover the most common pathologies, as well as more esoteric ones.

Key Highlights

- Reflects first-hand experience from the primary author who has provided board review in gastrointestinal imaging to hundreds of residents throughout the country
- Covers all body imaging modalities including CT, MRI, radiographs, fluoroscopy, and ultrasound
- Each case is supplemented by multiple choice questions color-coded by easy, medium, and hard that challenge readers to assess different levels of knowledge and think beyond the diagnosis
- Detailed explanations of correct and incorrect answers enhance learning

This high-yield study guide will provide radiology residents with a better understanding of gastrointestinal imaging and the knowledge to face the core exam with less trepidation.

This print book includes complimentary access to a digital copy on <https://medone.thieme.com>.

DESCRIPTION

The state-of-the-art resource on hand and wrist tendon surgery from renowned global masters

Surgical management of disorders impacting hand and wrist tendons is one of the most challenging and exacting aspects of hand surgery. *Tendon Disorders of the Hand and Wrist: IFSSH/FESSH Instructional Course Book 2022* is edited by well-known hand surgeons Dean E. Boyce, Grey Giddins, and David J. Shewring. The book was written as the accompanying text for the instructional course at the 2022 Joint Congress of the International Federation of Societies for Surgery of the Hand (IFSSH), the Federation of European Societies for Surgery of the Hand (FESSH), and the International Federation of Societies for Hand Therapy (IFSHT). Although practice inevitably evolves, this comprehensive book should serve as a useful guide and definitive reference for years to come.

The book is organized by six sections: Basic Science; Traumatic Injuries to the Extensor Tendons; Traumatic Injuries to the Flexor Tendons; Enthesopathies, Infection, and Inflammatory Problems; Pediatric Problems; and Tendon and Nerve Transfer. Chapters cover the pathogenesis, diagnosis, and surgical and nonsurgical management of the full spectrum of disorders and conditions. Disorder-specific chapters include indications for surgery, disorder classification, discussion of impacted tendons and muscles, diverse transfer and reconstruction techniques, and in many cases, the author's preferred surgical procedure.

Key Features

- Contributions from an impressive group of global masters in hand surgery detail proven and preferred techniques and approaches
- Tips and tricks throughout the text provide guidance on preventing complications and improving outcomes
- A wealth of high-quality, four-color illustrations and operative photos enhance the understanding of impacted anatomy and techniques

This is a one-stop resource on the surgical management of degenerative, developmental, and traumatic hand and wrist tendon disorders. It is an essential reference for trainee and practicing hand surgeons to improve their surgical skills and patient outcomes.

This print book includes complimentary access to a digital copy on <https://medone.thieme.com>.

COMPETITION There is no direct competition.

CONTENTS

Part I: Basic Science

1. Epidemiology
2. Anatomy and Biomechanics of the Extensor Tendon System
3. The Flexor System Anatomy and Biomechanics
4. Basic Science of Tendon Healing

Part II: Traumatic Injuries to the Extensor Tendons

5. Injuries at the Distal Interphalangeal Joint
6. Injuries at the Proximal Interphalangeal Joint
7. Injuries to the Sagittal Bands
8. Injuries at the Metacarpophalangeal Joint and "Fight Bites"
9. Helpful Details of Extensor Tendon Injury and Repair
10. Dorsal Hand Injury: Composite Loss
11. Rehabilitation Following Extensor Tendon Injury

Part III: Traumatic Injuries to the Flexor Tendons

12. Zone I Flexor Tendon Injury
13. Injuries in Zone II
14. Traumatic Injuries to the Flexor Tendons in Zones 3, 4, and 5
15. Injuries to the Flexor Pollicis Longus
16. Traumatic Pulley Problems
17. Closed Ruptures of Flexor and Extensor Tendons of the Wrist and Hand
18. Flexor Tendon: Late Reconstruction and Salvage Options

Part IV: Enthesopathies, Infection, and Inflammatory Problems

19. Trigger Digits
20. The "Swan-Neck" Deformity
21. De Quervain's and Intersection Syndrome
22. Rheumatoid Problems at the Metacarpophalangeal Joints
23. Rheumatoid Digits
24. The Elderly "Clasped Hand"
25. Infection of the Flexor Tendon Sheaths: Pyogenic Flexor Tenosynovitis

Part V: Pediatric Problems

26. Trigger Thumb and Finger
27. Tendon Injuries in Children

Part VI: Tendon and Nerve Transfer

28. Principles of Tendon Transfers
 29. Radial Nerve Palsy
 30. Ulnar Nerve Palsy
 31. Median Nerve Palsy
 32. Nerve versus Tendon Transfers
 33. Targeted Reconstructive Tendon Surgeries to Augment Key Hand Functions in Tetraplegia
-

TITLE	Science of Synthesis: Knowledge Updates 2022/2 1st Edition
PRICE	€2999.99
ISBN	9783132451933
PUBLICATION DATE	June 2022
FORMAT	Hardcover · 0 Illustrations · 500 Pages · 6.7 X 10.05 IN
SPECIALTY	Chemistry
LEVEL	Chemists

EDITORS **S. T. Diver**

T. J. Donohoe

J. A. Joule

DESCRIPTION The Science of Synthesis Editorial Board, together with the volume editors and authors, is constantly reviewing the whole field of synthetic organic chemistry as presented in Science of Synthesis and evaluating significant developments in synthetic methodology. Several annual volumes updating content across all categories ensure that you always have access to state-of-the-art synthetic methodology.

CONTENTS

- 10.17 Benzo[*b*]phospholes
- 10.18 Benzo[*c*]phospholes
- 10.20 Phosphorus Analogues of Indolizines
- 15.3.4 Quinolines (Update 2022)
- 46.5.7 Three-Component Coupling Reactions that Generate 1,3-Dienes
- 46.14 Conjugated Diene Synthesis by Rearrangement of 1,3-Dienes to 1,3-Dienes

OUT OF PRINT

Date	ISBN	Author	Title	New edition

Thieme Group Returns Policy

Effective from 1st January 2009

All consignments by Thieme Publishers are delivered without any automatic returns authorization provision. All returns are governed by the following rules:

General Remarks

- For all returns, authorization is granted strictly at the discretion of the publisher, except for faulty, damaged or wrongly delivered titles (see below)
- The basic principle for returns in any one year is that these should not exceed 5% of the previous year's net turnover for any one company
- The publisher does not guarantee to send back any products that are outside these returns rules and reserves the right to destroy these without compensation.
- Transport costs for returns are covered by the sender (except for Item 4)

1) Full credit can be granted only if

- prior permission to return has been requested and authorized
- the request for permission to return states invoice number, date, and reason for return
- returns are in mint condition, without defacing marks, stickers or security devices
- the request for return authorization is made at the latest twelve (12) months from invoice date
- returns are made directly to our warehouse address

2) No credit will be granted if products are

- returned without prior authorization
- not returned in a resalable condition as described above
- not accompanied by a delivery note listing invoice numbers and dates
- old or out-of-print editions returned more than three (3) months after publication of the new edition

3) No returns can be accepted or authorized

- if made or requested later than twelve (12) months from invoice date
- if made for the previous edition of a newly published work later than 3 months from publication date
- for offline electronic or audiovisual material for continuation orders, series orders and reduced-price or special priced books or sets
- for books with a selling price value (gross) of less than Euro 50.

4) No prior permission is required for

- imperfect copies
- wrongly delivered books (publisher's error)

In such cases, please include invoice number, date, and reason for return.

For our full terms and conditions please go to
www.thieme.com/termsoftrade
