DESCRIPTION
Filling a gap in the literature, this unique and innovative reference is a comprehensive guide to the management of sinonasal complications of dental disease and treatment. It bridges the fields of otorhinolaryngology and oral surgery, providing multidisciplinary and precise discussion of the etiology, prevention, diagnosis, and treatment of sinonasal complications. The text considers complications following inadequately treated dental infection, improper endodontic treatments, implant placement, and maxillary sinus grafting prior to or in association with oral implant placement.
