## DESCRIPTION

This larger-format third edition of a remarkable atlas reflects the latest advances in the constantly evolving specialty of ophthalmology. Firsthand knowledge is culled from the authors’ decades of patient consultations, teaching, and combined surgical experience. Cataract, diabetic retinopathy, glaucoma, and age-related macular degeneration are covered along with other eye diseases affecting millions of people worldwide. Disorders less frequently seen in clinical practice—such as uveal coloboma, Coats disease, and rare tumors—are included in its comprehensive coverage.

## SALES HOOKS

- A detailed chapter on clinical ophthalmological examination
- Anatomical, pathophysiological, diagnostic, and clinical data on every area of the eye—from the eyelid to the orbital cavity
- 600 of the highest quality color photographs, superb illustrations, and overviews illustrate clinical findings and pathophysiology
