NEW
Interventional Radiology in Trauma
J. Tisnado, MD
R.R. Ivatury, MD

*Interventional Radiology in Trauma* is a reference that brings together the insights and expertise of Dr. Tisnado, an interventional radiologist, and Dr. Ivatury, a trauma surgeon, to guide surgeons on how to effectively integrate both specialties into their management of trauma patients.

Summer 2014/378 pp./672 illus./hardcover/
ISBN 978-1-6040-6311-0

Critical Care Radiology
C. Schaefer-Prokop, MD

Learn to make quick diagnoses in critical situations with this user-friendly companion for ER radiologists. Each chapter contains brief descriptions of normal and morphologic findings, imaging strategies and techniques, differentials, and complications. Includes 550+ high-quality radiographs and CT scans.

2011/248 pp./561 illus./hardcover/
ISBN 978-3-13-150051-9

NEW
Essential Radiology
Clinical Presentation • Pathophysiology • Imaging
Third Edition
R.B. Gunderman, MD, PhD

*Essential Radiology, Third Edition*, is an extensively revised and updated text that provides a highly engaging, integrated overview of the use of radiology in every specialty and subspecialty, covering all imaging modalities and organ systems.

2014/344 pp./607 illus./softcover/

Visit [www.thieme.com/radiology](http://www.thieme.com/radiology) for more great products and special offers.
NEW

MRI Essentials for the Spine Specialist
A.J. Khanna, MD

Designed specifically for spine surgeons, this book enables clinicians to develop a systematic approach to the interpretation of MRI studies. It helps surgeons gain a solid understanding of essential concepts, including the physics of MRI and normal MRI anatomy of spine, and presents an overview of core concepts of image interpretation.

2014/304 pp./489 illus./hardcover/
ISBN 978-1-60406-877-1

NEW

MRI for Orthopaedic Surgeons
A.J. Khanna, MD

"An excellent review...the image quality is excellent for providing illustrative examples."
—Doody’s Review

FEATURES
• Practical discussion of how other imaging modalities correlate with MRI
• In-depth coverage of special considerations for imaging articular cartilage, advanced techniques in musculoskeletal MRI

2010/464 pp./857 illus./hardcover/

NEW

Essentials of Clinical MR
V.M. Runge, MD
J.N. Morelli, MD

This accessible manual provides the must-have background users need to read MR images and make successful clinical diagnoses.

FEATURES
• In-depth coverage of the diseases most frequently seen in clinical practice
• 650+ high-resolution images clearly illustrate each problem

2011/264 pp./678 illus./softcover/

NEW

Differential Diagnosis in Musculoskeletal MRI
G.M. Hollenberg, MD
E.P. Weinberg, MD
S.P. Meyers, MD, PhD

Differential Diagnosis in Musculoskeletal MRI is a unique desk reference offering extensive descriptions of MRI findings that enable radiologists to more easily diagnose a wide range of musculoskeletal conditions. The most essential content covering etiologic, clinical, and pathological aspects is in tabular format, making it quick and easy to obtain information.

Summer 2014/864 pp./2,043 illus./hardcover/

NEW

Measurements and Classifications in Musculoskeletal Radiology
S. Waldt, MD
K. Woertler, MD

This practical book describes in detail all of the established measurement methods applied using conventional and sectional imaging. It includes over 360 drawings and radiological images which show the appropriate measurement lines and markings.

2014/232 pp./423 illus./hardcover/
ISBN 978-3-13-169271-9

NEW

The Physics of Clinical MR Taught Through Images
Third Edition
V.M. Runge, MD et. al

This updated edition of The Physics of Clinical MR Taught Through Images has been completely rewritten and includes key information on how to apply an understanding of physics to improve diagnostic images.

2014/288 pp./641 illus./softcover/
ISBN 978-1-60406-720-0
Peripheral Vascular Interventions: An Illustrated Manual
J. Schroeder, MD
This compact, richly illustrated text presents a uniquely visual representation of the procedures interventionalists need to master to perform peripheral vascular interventions successfully. Written and illustrated by a skilled practitioner with many years of hands-on clinical experience, it shares his knowledge, advice, and techniques — giving readers the sense of sitting side-by-side with him at the angiography table.
2013/240 pp./573 illus./hardcover/
ISBN 978-3-13-169751-6

Imaging for Otolaryngologists
E.A. Dunnebier, MD
This pocket guide distills the basics of ENT radiology into a concise how-to manual that contains everything otolaryngologists need to identify normal radiographic anatomy and to interpret images for common and uncommon differentials and surgical planning.
2011/356 pp./465 illus./softcover/
ISBN 978-3-13-146331-9

Percutaneous Tumor Ablation Strategies and Techniques
K. Hong, MD
C.S. Georgiades, MD, PhD
Leading authorities come together in this must-have clinical reference to provide a complete overview of everything physicians and other health professionals need to know to successfully implement and administer an image-guided ablation service.
2011/208 pp./504 illus./hardcover/

CT Colonography: A Guide for Clinical Practice
T. Mang, MD
W. Schima, MD
This book provides a concise overview of the examination technique of CT colonography and the interpretation of results. For those who want to learn more about the technique, this book provides a simple introduction to CT colonography, while for the experienced examiner it offers further tips on how to improve examination technique and avoid common pitfalls.
2013/208 pp./428 illus./hardcover/
ISBN 978-3-13-147261-8

Differential Diagnosis in Computed Tomography Second Edition
F.A. Burgener, MD et. al
In this fully updated second edition of the bestseller, essential information is presented in succinct yet comprehensive table form, making it an ideal study tool. New chapters cover meningeal and calvarian lesions and trauma.
2012/868 pp./2,146 illus./hardcover/

Clinical Cardiac CT Anatomy and Function Second Edition
E.J. Halpern, MD
“Well written [and] well organized...provides everything that a physician would need to know in order to include cardiac CT in his or her practice...a pleasure to read.”
—Radiology
The accompanying DVD contains 3-D displays of anatomic relationships and cine clips of more than 200 cases that demonstrate cardiac function and valve evaluation.
2011/448 pp./1,163 illus./hardcover/
Clinical Sciences Flexibooks
Each of these lavishly illustrated pocket atlases by Drs Moeller and Reif features hundreds of stunning illustrations and a user-friendly two-page format that helps tackle complex information in small, easy-to-digest sections.

Pocket Atlas of Sectional Anatomy
CT and MRI
Vol. I: Head and Neck
Vol. II: Thorax, Heart, Abdomen, and Pelvis
Vol. III: Spine, Extremities, Joints
FEATURES
• Practical two-page units comprised of radiographs on one page and full-color schematics on the facing page
• Consistent color coding enables easy identification of individual structures across several slices
• Numerous CT and MR images of the highest quality

MRI Parameters and Positioning
Second Edition
2010/352 pp./340 illus./ softcover/
ISBN 978-3-13-130582-4

Normal Findings in CT and MRI
2000/256 pp./210 illus./softcover/
ISBN 978-3-13-116521-3

Normal Findings in Radiography
2000/294 pp./190 illus./softcover/

Pocket Atlas of Radiographic Anatomy
Third Edition
2010/400 pp./283 illus./softcover/
ISBN 978-3-13-784203-3

Pocket Atlas of Radiographic Positioning
Second Edition
2009/392 pp./491 illus./softcover/
ISBN 978-3-13-107442-3
Practical MR Mammography
High-Resolution MRI of the Breast
Second Edition
U. Fischer, MD

Acclaim for the first edition:
“A handy reference of MRI findings... strongly recommended...” -- Acta Radiologica

FEATURES
• Exquisitely clear, high-resolution MR images of both common and rare breast lesions
• New chapter on MRM-BIRADS
2012/300 pp./1,351 illus./hardcover/

Teaching Atlas of Mammography
Fourth Edition
L. Tabar, MD
P.B. Dean, MD
T. Tot, MD

The approach of this atlas is to teach the reader how to analyze the image and reach the correct diagnosis through proper evaluation of the mammographic signs. It offers a unique comparison of imaging findings with the corresponding large thin-section and subgross thick section (3D) histologic images.
2012/312 pp./669 illus./hardcover/
ISBN 978-3-13-640804-9

Interventional Breast Imaging
Ultrasound, Mammography, and MR Guidance Techniques
U. Fischer, MD
F. Baum, MD

“Simulates the experience of having the direct supervision of a more seasoned radiologist colleague...one could find the answers to virtually any question about breast imaging interventional procedures.”—Doody’s Review
2010/264 pp./1,295 illus./hardcover/
ISBN 978-3-13-146701-0

NEW
Diagnostic Breast Imaging
Mammography, Sonography, Magnetic Resonance Imaging, and Interventional Procedures
Third Edition
S.H. Heywang-Koebrunner, MD
I. Schreer, MD
S. Barter, MD

Comprehensive and systematic, this important new edition covers all imaging modalities for diagnosing breast disorders.

NEW KEY FEATURES
• PET and “novel” modalities
• Lymph nodes (sentinel node)
• Staging breast cancer
2014/712 pp./1,200 illus./hardcover/
ISBN 978-3-13-102893-8

Diagnosis of Breast Diseases
Integrating the Findings of Clinical Presentation, Mammography, and Ultrasound
V. Barth, MD

This atlas provides radiologists with essential information for the differential diagnosis of breast diseases on the basis of clinical presentation, mammography, and ultrasound. It begins with chapters on tumor biology, prognostic factors, and histology.
2011/448 pp./1,560 illus./hardcover/
ISBN 978-3-13-143831-7

Multimodality Breast Imaging
A Correlative Atlas
Second Edition
B. Hashimoto, MD, FACR

A systematic visual collection of pathologic entities and a detailed assessment of how to approach the integration of mammography, sonography, MRI and PET/CT in breast cancer diagnosis.
2010/664 pp./806 illus./hardcover/
NEW

Interventional Ultrasound
Practical Guide and Atlas
C. Dietrich, MD
D. Nuernberg, MD
This manual offers practical instructions and guidance for physicians learning interventional ultrasound procedures and support for more advanced practitioners when problems or questions arise. It covers the full range of possible applications, presenting the current state of the art but also covering innovative procedures that are being introduced into clinical practice.
2014/456 pp./609 illus./hardcover/

Color Atlas of Ultrasound Anatomy
Second Edition
B. Block, MD
The convenient, double-page format of this atlas, with more than 250 “image quartets” showing ultrasound images on the left and explanatory drawings on the right, is ideal for rapid comprehension. Each image is accompanied by a line drawing indicating the position of the transducer on the body and a 3-D diagram demonstrating the location of the scanning plane in each organ.
2012/328 pp./600 illus./softcover/
ISBN 978-3-13-139052-3

Abdominal Ultrasound: Step by Step
Second Edition
B. Block, MD
This book is designed to be kept close at hand during actual ultrasound examinations. The clear, systematic approach shows you how to recognize all important ultrasound phenomena, locate and delineate the upper abdominal organs, explain suspicious findings, and easily distinguish between normal and abnormal images.
2011/304 pp./912 illus./softcover/
ISBN 978-3-13-138362-4

Musculoskeletal Ultrasound with MRI Correlations
V.S. Dogra, MD
D. Gaitini, MD
With an emphasis on the accuracy and dynamic nature of no-radiation ultrasound, renowned experts provide practical guidance on how to combine different multiplanar imaging modalities in order to analyze and diagnose common musculoskeletal disorders.
2011/258 pp./864 illus./hardcover/
ISBN 978-1-60406-244-1

Ultrasound-Guided Procedures
V.S. Dogra, MD
W.E.A. Saad, MBBCh.
“Covers the gamut of procedures...provid[es] pictures and animations for each of the steps involved in the procedures...very useful as a learning tool and as a quick reference.”
—Doody’s Review
Concise and easy-to-consult, this step-by-step guide provides in-depth instruction on the full range of frequently performed ultrasound-guided procedures in a user-friendly, bulleted format.
2010/344 pp./615 illus./softcover/

Thieme Clinical Companions: Ultrasound
G. Schmidt, MD
This compact book provides radiologists, ultrasonographers, residents, and trainees with a handy, portable guide to managing problems in the everyday setting. The first section of the book provides a thorough review of basic physical and technical principles and examination techniques. In the second section of the book, the author helps the clinician answer such questions as:
2007/484 pp./1,001 illus./softcover/
ISBN 978-1-3-13-142711-3
FRCR 2B Viva: A Case-based Approach
P. Sidhu, BSc MBBS MRCP FRCR DTM&H
S. Ryan, MRCPI FRCR
P. Lung, BSc (Hons.) MBBS FMCS FRCR
This book covers the full range of subjects and materials trainees can expect, and is marked by hundreds of top-quality images and concise explanations — ideal for all candidates who need to get the highest yield out of their study time.

SPECIAL FEATURES
• 136 clinically relevant sample cases with notes on further questions
• Book is formatted in tutorial-style teaching points, perfect for learning and quick recall
2013/304 pp./409 illus./softcover/
ISBN 978-3-13-166291-0

Nuclear Medicine Board Review
Questions and Answers for Self-Assessment
Third Edition
C.R. Goldfarb, MD et. al
Complete with more than 2,000 questions and answers, this third edition prepares readers for certification or re-certification exams. It is a handy reference and contains up-to-date coverage of all major advances in the field.
2012/224 pp./softcover/
ISBN 978-1-60406-689-0

Case-Based Nuclear Medicine
Second Edition
K.J. Donohoe, MD
A.D. Van den Abbeele, MD
Each chapter in this book is packed with high-quality images that demonstrate the full-range of commonly encountered disease manifestations as seen in the practice of nuclear medicine.
2011/600 pp./442 illus./softcover/
ISBN 978-1-58890-652-6

NEW
Passing the FRCR Part 1: Cracking Anatomy
N. Moore, MA FRCP FRCR
This book is designed to be a revision aid for the new format of the First Part 1 anatomy exam that was introduced in Spring 2013. It is divided into four sections to reflect the different components of the syllabus and includes a mock exam to give readers practice taking a typical exam under timed conditions.
2014/350 pp./320 illus./softcover/
ISBN 978-3-13-198761-7

Avoiding Errors in Radiology
Case-Based Analysis of Causes and Preventive Strategies
K.J. Lackner, MD
K.B. Krug, MD
Every case report in this unique text has been drawn from actual case files to enable the reader to benefit from the collective experience of the experts and learn from past mistakes.
2011/402 pp./956 illus./hardcover/
ISBN 978-3-13-153881-9

RadCases
Key cases from rounds, rotations and exams

EACH RADCASES TITLE FEATURES
• 100 carefully chosen cases with high-quality radiographs
• The ‘top 3’ differentials per case to hone your skills
• Examples of critical cases that must be diagnosed immediately
• A scratch-off code for 12 months access to a searchable online database of all 100 cases plus an additional 150 cases in that book’s specialty

Ultrasound Teaching Manual
The Basics of Performing and Interpreting Ultrasound Scans
Third Edition
M. Hofer, MD, MPH, MME
This workbook guides you systematically through the individual organ systems.
The videos ideally supplement the book and demonstrate basic anatomy for ultrasound, optimum transducer positioning, and the relationship between transducer position and monitor display.
2013/132 pp./741 illus./softcover/

CT Teaching Manual
A Systematic Approach to CT Reading
Fourth Edition
M. Hofer, MD, MPH, MME
FEATURES
• Updated coverage of examination protocols for multidetector CT and CT angiography
• New chapters on dual source CT and contrast injectors
2011/224 pp./1,170 illus./softcover/
ISBN 978-3-13-124354-6

Teaching Manual of Color Duplex Sonography
A Workbook on Color Duplex Ultrasound and Echocardiography
Third Edition
M. Hofer, MD, MPH, MME
FEATURES
• 500 detailed images are ideal for the visually oriented learner
• Numerous diagrams demonstrate the correct way to handle the transducer and position the scan plane
2011/120 pp./500 illus./softcover/
ISBN 978-3-13-127593-6

Chest Imaging Case Atlas
Second Edition
M.S. Parker, MD
M.L. Rosado-de-Christenson, MD
G.F. Abbott, MD
This atlas contains over 200 cases on conditions ranging from Adenoid Cystic Carcinoma to Wegener Granulomatosis.
SPECIAL FEATURES
• More multiplanar, CTA, MRI, and 3D imaging
• A new post-thoracotomy chest section
2012/996 pp./1,584 illus./hardcover/

Chest Radiology: A Resident’s Manual
J. Kirchner, MD
This user-friendly guide leads the reader through systemic image analysis. A scratch-off code provides access to a searchable online database of 250 must-know thoracic imaging cases. Cases describe and discuss frequently asked questions regarding heart failure, bronchitis, pneumonia, bronchial carcinoma, fibrosis, pleural disorders, and more.
2011/300 pp./630 illus./hardcover/
ISBN 978-3-13-153871-0

Top 3 Differentials in Radiology
A Case Review
W.T. O’Brien, Sr., DO
“High yield…both a good board review and a useful quick reference.”—American Journal of Neuroradiology
This essential reference for Board preparation features 325 cases broken down into sections based on radiology subspecialties.
2010/720 pp./713 illus./softcover/
NEW

Neurointerventional Techniques
Tricks of the Trade
F.L. Gonzalez, MD
F.C. Albuquerque, MD
C.G. McDougall, MD
This practical reference includes over 50 procedures as well as important chapters on access points, physiological testing, and pharmacology in the endovascular suite.

FEATURES
• Strong emphasis on complication avoidance
• Appendices are rich with information on catheters, presented in an easy-to-access tabular format
2014/337 pp./479 illus./hardcover/

Interventional Stroke Therapy
O. Jansen, MD
H. Brueckmann, MD
From advanced neuroimaging studies to state-of-the-art endovascular therapies, this expertly written book covers the materials, instruments, devices, procedures, and strategies that lead to optimal results, and benefit the patient during this critical time.
2013/220 pp./316 illus./hardcover/
ISBN 978-3-13-169921-3

Cranial Nerves: Anatomy, Pathology, Imaging
D.K. Binder, MD, PhD,
D.C. Sonne, MD
N.J. Fischbein, MD
FEATURES
• Concise, bulleted text enables rapid reading
• Clinical information and key imaging findings for diagnosis and treatment
2010/248 pp./469 illus./softcover/
ISBN 978-1-58890-402-7

NEW

The Human Brain in 1969 Pieces 2.0
Structure, Vasculature, Tracts, Cranial Nerves, and Systems
W.L. Nowinski, DSc, PhD
Be.C. Chua, MTech
Synthesizing science and art, The Human Brain in 1969 Pieces 2.0 is an updated CD that features a resizeable user interface, labeling of 3D cuts and triplanar images, and new content on muscles and glands, cerebral vertebrae, and head outlines.
2014/CD-ROM for Mac and PC/
ISBN 978-1-62623-019-4

Case-Based Brain Imaging
Second Edition
A. Tsiouris, MD,
J. Communale, MD
P. Sanelli, MD
This book provides complete coverage of the latest technological advancements in brain imaging. It contains more than 150 cases that include detailed discussion of the pathology, treatment, and prognosis of common and rare brain diseases, congenital/developmental malformations, cranial nerves, and more.
2013/704 pp./1,292 illus./softcover/

FORTHCOMING

Imaging of Traumatic Brain Injury
Y. Anzai, MD, MPH
K.R. Tozer Fink
This radiological reference covers all aspects of neurotrauma imaging and provides a clinical overview of traumatic brain injury (TBI). It includes acute head trauma, pathophysiology of TBI, and the application of advanced imaging technology to TBI.
Summer 2014/304 pp./660 illus./hardcover/
ISBN 978-1-60406-728-6

Visit www.thieme.com/radiology for more great products and special offers.
Differential Diagnosis in Pediatric Imaging

R. van Rijn, MD
J.G. Blickman, MD, PhD, MPH

Differential Diagnosis in Pediatric Imaging offers the most up-to-date knowledge of pediatric imaging diagnostic techniques. It provides imagers, clinicians, and trainees with simple methods to evaluate both frequently and rarely seen diseases and disorders, and suggests differential diagnoses, fully taking into account clinical findings.

2011/692 pp./1,175 illus./hardcover/

Pediatric Imaging Essentials

M. Riccabona, MD

This informative, reader-friendly text covers current guidelines and key topics in the field, including choice of modality, equipment and dosages, child-specific diseases, and safety factors. It is invaluable for all specialists who diagnose and manage this sensitive, highly targeted population.

2014/680 pp./1,650 illus./hardcover/
ISBN 978-3-13-169731-8

NEW

Diagnostic Pediatric Ultrasound

E. Beek, MD
R. van Rijn, MD

This book is a “go-to” reference that is especially suitable for day-to-day use in clinical practice, for both radiologists and other clinicians using ultrasonography in pediatric care.

2014/364 pp./633 illus./softcover/
ISBN 978-3-13-166191-3

NEW

Radiographic Atlas of Skeletal Maturation

S.L. Kahn, MD et. al

This atlas provides access to nearly 2,300 high-quality images that provide instant reference to “normal” views of the skeleton at every developmental milestone, available in both the text and accompanying DVD. It gives physicians the full range of comparative information they need to interpret pediatric skeletal radiographs in any clinical setting.

2012/620 pp./2,297 illus./hardcover with DVD/
ISBN 978-1-60406-571-8

NEW

Chest Radiographic Interpretation in Pediatric Cardiac Patients

S.J. Yoo, MD, FRCPC
C. MacDonald, MD
P. Babyn, MD

Authored by leading experts and innovators at the world-renowned Hospital for Sick Children in Toronto, this comprehensive text explains how to interpret chest radiographs and how to report that information in daily practice.

2010/317 pp./420 illus./hardcover/

Dx-Direct series gets to the point!

You will find the information you need for each condition or disease along with high-quality diagnostic images.

The series covers these topics:

- Brain Imaging
- Breast Imaging
- Cardiac Imaging
- Gastrointestinal Imaging
- Head and Neck Imaging
- Musculoskeletal Imaging
- Pediatric Imaging
- Spinal Imaging
- Thoracic Imaging
- Urogenital Imaging
- Vascular Imaging

For individual titles please go to www.thieme.com and search for Dx-Direct.
