**COMPETITION**

1) Court-Brown: *Rockwood and Green's Fractures in Adults, 8th edition*, 2,769 pages (two volumes), LWW, 2014, $499.99. Comes with enhanced ebook and videos. A landmark book that helps define the field. It should be seen as a competitor even though it covers all aspects of fractures, while Stannard focuses on surgical management.

3) Tornetta: *Operative Techniques in Orthopaedic Trauma Surgery*, 672 pages, LWW, $261.99. This is a step-by-step line drawings book, which is a different approach than Stannard.

4) Wiss: *Master Techniques in Orthopaedic Surgery: Fractures*, 848 pages, LWW, 2012, $249.99. Combination of line drawings and color images describing surgical technique. Stannard is positioned as a more practical, concise, clinical alternative to Browner and Rockwood and Green, yet it offers considerably more coverage than the surgical techniques book. This combination of comprehensiveness but not too much textbook is an appealing concept to orthopaedic surgeons.
