

# Thieme Open

Want to share your scientific treasures?  
**Publish with Thieme!**

**OPEN  
ACCESS**

 **Thieme**

**Increase visibility. Broaden readership. Heighten impact.**

Open Access articles are available worldwide to read, download, print and share. Without subscription, anybody can immediately, permanently and independently access these articles. No viewing restrictions lead to much higher visibility and discoverability. The broadened readership means more citations of your publication.

**Rapid online submission. Fast article publication.**

Publishing Open Access means immediately sharing your research with peers around the world. Thieme's fast processes ensure that your work undergoes efficient review and publication, so you can stay on the cutting edge of science. Want to see your research online as quickly as possible? Publish Open Access with Thieme!

**Fast and fair peer review by leading specialists.**

Just because it's free to read, Thieme Open Access doesn't sacrifice quality. Articles we publish undergo the stringent, fair and high quality peer review process which you have come to expect from us.

**High quality editorial services and support.**

We offer high quality editorial, authorial and production services. We take care so that your research is published in the most professional and attractive way!

**WHAT IS OPEN ACCESS?**

- Free online access to read, share and download scientific articles for everyone
- Free access means no subscription or institutional license is required
- Readers don't pay: publication costs are covered by article publication charges (APCs)

**WHAT IS AN ARTICLE PUBLICATION CHARGE OR APC?**

- A fee covered by the authors, their institution or the funding body which supported the research
- This contribution supports publishing costs, which include editing processes (such as peer review), typesetting, indexing, disseminating, hosting on servers, and archiving
- This fee is paid upon acceptance of the author's manuscript or via alternative arrangements with institutions and funders

**HOW DOES THIEME MAINTAIN HIGH QUALITY STANDARDS FOR PUBLISHING RESEARCH?**

- Fast and fair peer review of submitted articles
- No charges apply if a manuscript gets rejected

**STILL HAVE QUESTIONS?**

Please contact [openthieme@thieme.de](mailto:openthieme@thieme.de) and we will respond to you as quickly as we can!

**WHAT ABOUT...**

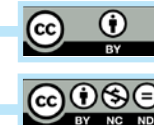

**...FINDING FUNDING?**

- Check your research grant budgets
- Seek out publication funds from your university
- Look into funding organizations

Tip: Access to funding might be available through your department. If you want to publish Open Access but your original grant did not budget for APCs, please get in touch with your funding body or your university. Check ROARMAP or Sherpa to find out if your funder or institution supports and recommends publishing Open Access.

**...COPYRIGHT STIPULATIONS FOR YOUR RESEARCH?**

All Thieme Open Access articles are published under a Creative Commons CC BY-NC-ND or CC BY license.

- You retain the copyright and re-use rights to your work
- A CC BY-NC-ND or a CC BY license always appropriately credits the copyright holder
- The different CC licenses accommodate compliance requirements
- Because you retain your copyright, a Copyright Transfer Agreement (CTA) is required to allow Thieme Open to legally publish and use your copyrighted material
- To learn more about these licenses, please visit <http://creativecommons.org>.
- Please note that Thieme is a SHERPA/RoMEO blue publisher that allows posting of the final publisher's PDF on your PERSONAL website.
- For information on sharing an article, please visit <http://open.thieme.com/authors>.

**...SCIENTIFIC LISTING AND INDEXING SERVICES?**

The application process for listing and indexing starts as soon as a new Thieme Open Access journal launches. Thieme journals are indexed in renowned scientific indexing services or directories such as PubMed Central, ESCI, Scielo, Directory of Open Access Journals (DOAJ), Scopus or Embase.

### Thieme's Open Access titles:

- AJP Reports
