

Dear Residents and Fellows,

With the field of hip surgery ever evolving, the *Journal of Hip Surgery* was established to facilitate the transmission of innovative research and educational reports to surgeons, health care providers and institutions in the field.

As part of its goal, the *Journal of Hip Surgery* is introducing the **Resident and Fellow Series** and **Young Investigator Award**. Residents and fellows in hip surgery are invited to submit first author manuscripts in hip surgery to be considered for publication. Submissions may cover any specialty in hip surgery and be original articles based on research undertaken during residencies or fellowships, review articles or case reports.

The editors of the *Journal of Hip Surgery* will select one Resident and Fellow Series article each year for the Young Investigator Award. The author of the chosen article will be awarded a cash prize of \$500 and a free *Journal of Hip Surgery* subscription.

To submit a Resident and Fellow Series manuscript, go to <https://mc.manuscriptcentral.com/johs>, log in and select the Resident and Fellow Series tab. This step is very important as this will identify that your manuscript is for the Resident and Fellow Series. Please refer to the Author Instructions for a step by step guide for submission.

We look forward to receiving your manuscripts.
